

Université du Québec à Montréal

## **Software Engineering Management Laboratory**

# **Function Point Tool Market Survey 1996**

Research report prepared by  
**Olavo Mendes, Alain Abran, Pierre Bourque**

December, 14 1996

## 1. Overview of Survey Results

- 1.1 Vendors
- 1.2 Tools Surveyed
- 1.3 Detailed Classification
- 1.4 Abbreviations
- 1.5 Classification Grid: Summary
- 1.6 Distribution by Type
- 1.7 Distribution by Country
- 1.8 Distribution by Platform
- 1.9 Distribution by Operating System / Interface

## 2. Detailed Results

- 2.1 FP Tool Classification Using the Proposed Taxonomy
- 2.2 FP Tool Classification Using Codes
- 2.3 FP Tools by Category
- 2.4 Overview: FP Tool Categories
- 2.5 Interactions Between Categories
- 2.6 Product Index
- 2.7 Vendor Index
- 2.8 FP Tool Capability Matrix: Summary and Detailed Features
- 2.9 Classification by Country
- 2.10 Classification by Platform
- 2.11 Classification by Operating System
- 2.12 Price Structure
- 2.13 Developer & Vendor Addresses
- 2.14 Automatic FP Counting Tools
- 2.15 Other FP Tools Recently Identified

## Appendices

- Product Information

## **Overview of Survey Results**

## FP Tool Vendors

Vendor
AGS Management Systems
Angel Group
ABT Corporation
Cayenne / Backman Information Systems Inc.
CAP Gemini / CAP Volmac
Charismatek Software Metrics
CMD - CASE Methods Development Corporation
Computer Associates International Inc.
CIM
Data Processing Organization
DDB Software Inc.
Development Support Center Inc.
Durr Comsoft
G A SEER Technologies
GEC - Marconi Systems Technologies
Information Technology Development Center (TIEKE)
Integrated Software Specialists Inc.
Interfase S.A.
Koch Productivity Consulting
Lockheed Martin Price Systems
Micro Focus, Ltd.
Olivetti Group - SIP
Productivity Management Group Inc.
Protellices Software Inc.
QP Management Group Inc.
Quality Xperience Solutions
Quantitative Software Management Inc.
Resource Calculations Inc.
SofStar Systems
Software Productivity Research
Strategic Systems Technology
Hydro Québec - Systemhouse
Texas Instruments Inc.
Unisys
VIASOFT Inc.

## FP Tools Surveyed

Product	Version
AEM - Adaptive Estimating Model	
Asset - R	
AutoPoint	1.0
Cayenne / Bachman FP Analyst	
Before You Leap	1.52
CA - Estimacs	7.1
CA - FPXpert	3.1
CA - Metrics	3.0
CheckPoint	2.3
CIM Aid	2.0
Composer: FP Calculation Report	3.0
Costar	
Enterprise Software Planner	
ESTEEM	1.1
firstCASE	3.5
ForeSight	β test
FP Estimator	1.0
FP Fast	3.1
FP Manager	1.03
FP Mentor	1.5
FPSII - FP System II	<b>2.11</b>
FP Tool	
Function Point Workbench	2.02F
GPM	1.4
LATURI	2.0
LDA - LINC Development Assistant	
MARS	
Metrics Manager	1.0
Micro Focus Revolve	3.1
Micro Man Esti Mate	
Micro Man II	
PADS	
PCA Calc	1.0
PRICE S	<b>2.11</b>
Productivity Manager	3.5
Project Workbench	3.0
Project Bridge Modeler	3.0
PQM <i>Plus</i>	2.0
Quality Xpert	
SEER - Software Sizing Model	1.18
SEER - Software Evaluation Model	4.5
SFERA	2.0
Size Planner	
Size Plus	<b>1.2</b>
SLIM	4.0
SLIM Control	2.0
SLIM Metrics	2.0
SMART Counter	2.0A
SMART Data	1.0
SMART Risk	<b>1.0</b>
Synergy	
VIA / RECAP - ESW Portfolio Analysis	2.1

## Detailed Classification Grid

Activities	#	Main Category	Features	FP Tool available
<b>Project Planning &amp; Sizing</b>				Yes
<b>Planning*</b>	<b>0</b>	[ PLAN ]	[ PLA ]	
<b>Sizing (Size Estimation)*:</b>		[ SIZ ]		Yes
<b>Detailed FPA :</b>				
FP Data Collection and Calculation	<b>1</b>		[ DCC ]	Yes
Expert System that Assist with FP Counting	<b>2</b>		[ EXP ]	Yes
Automatic FP Counting	<b>3</b>		[ AUT ]	Yes
<b>High Level</b>	<b>4</b>		[ SIZE ]	Yes
<b>Estimating - Predicting*:</b>	<b>5</b>	[ EST ]		Yes
<b>Effort - Schedule/Duration - Staff /Team Size - Cost ...</b>			[ EST ]	
Analysis: Risk (5A), Productivity (5B), Quality (5C), Value (5D), Financial, Tradeoff, What-if ...	5A 5B ...		[ RISK ] [ PROD ] [ QUA ] [ VAL ] [ ..... ]	
<b>Management (Scheduling, Tracking &amp; Control) *:</b>	<b>6</b>	[ MGM ]		Yes
<b>Scheduling: Activities - Staff - Costs ...</b>			[ SCHED ]	
<b>Tracking:                    „</b>			[ TRACK ]	
<b>Trending:                    „</b>			[ TREND ]	
<b>Controlling (Re-planning: Tradeoff Analysis):                    „</b>			[ CTRL ]	
<b>Software Measures Repository *:</b>	<b>7</b>	[ SWM ]		Yes
<b>FP Counts Repository</b> (already computed in types tool 1 to 6)	-			
<b>Project's Measures &amp; Metrics Repository</b> (including FP Counts)				
<b>SW Metrics Tracking</b> ( <i>post facto</i> )			[ MTRACK ]	
<b>SW Metrics Trending</b> ( <i>post facto</i> )			[ MTREND ]	
<b>SW Metrics Analysis</b> ( <i>post facto</i> )			[ MANA ]	
<b>Evaluation (Assessment &amp; Comparisons) *:</b>	<b>8</b>	[ EVAL ]		Yes
<b>Process Assessment</b>			[ ASSESS ]	
<b>Baselining</b>			[ BASE ]	
<b>Benchmarking</b>			[ BENCH ]	
<b>Training:</b>	<b>9</b>	[ TRAIN ]		Yes
<b>FPA Tutorial</b>			[ TRAIN ]	
<b>FPA Guidance</b>			[ GUIDE ]	
<b>Documentation *:</b>	<b>10</b>	[ DOC ]		Yes
<b>Computer Based FP Documentation : Rules - Case Studies ...</b>			[ DOC ]	

\*: For all FP tools the following facilities are included : Data storage - Printing - Reporting

## Abbreviations

### Main Categories

[ DOC ]	Documentation of IFPUG - CPM counting rules (hypertext and other computer based supports )
[ EVAL ]	Internal & External Evaluation : Process Assessment - Project Baselineing - Benchmarking
[ EST ]	Project Estimation Based on FP Counts
[ MGM ]	Project Management: Scheduling - Tracking - Trending - Controlling - Reporting
[ SIZ ]	Project Sizing
[ SWM ]	Software Measures & Metrics Repository, Analysis & Reporting
[ TRAIN ]	FP Individual Training: FPA concepts tutorial

### Tool Functionalities

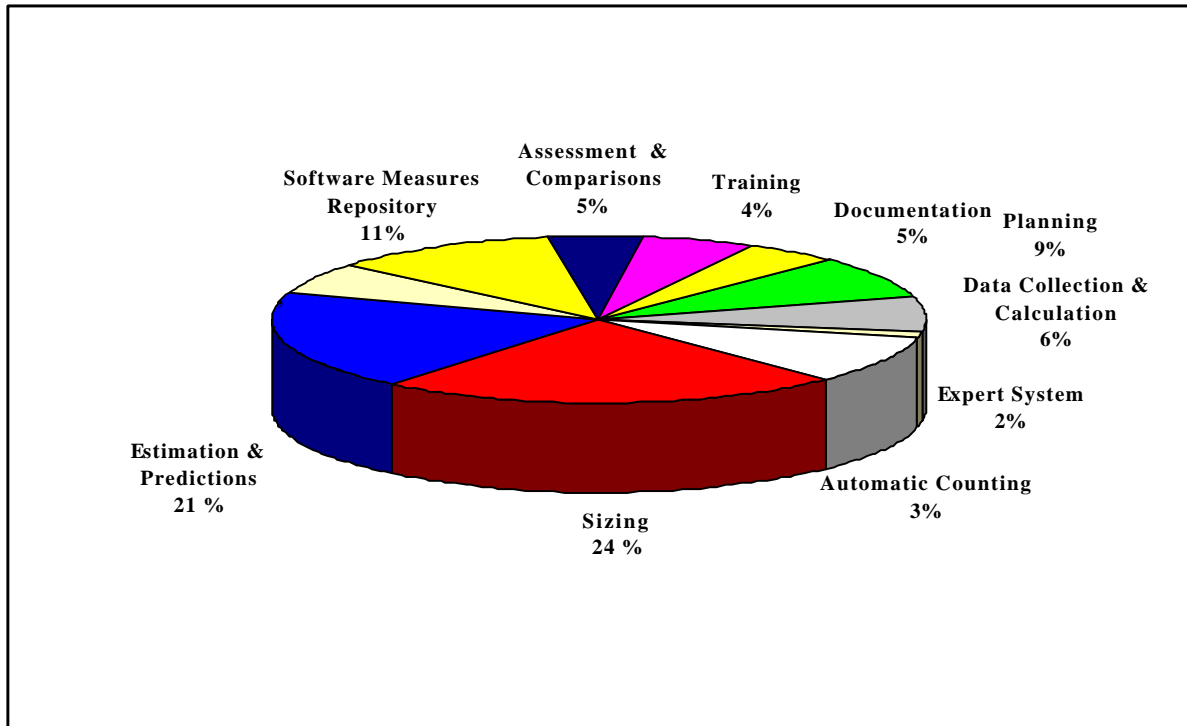

[ ANA ]	Analysis: Risk - Value - Quality - Defect - Reliability - Financial ...
[ AUT ]	Automatic FP Calculation (Type 3 Tool - IFPUG)
[ BASE ]	Project Baselineing
[ BENCH ]	Benchmarking
[ CRTL ]	Project Controlling
[ DCC ]	FP Data Collection And Calculation (Type 1 Tool - IFPUG)
[ DEF ]	Defects Analysis
[ DOC ]	Documentation of IFPUG - CPM counting rules (hypertext and other computer based supports )
[ EST ]	Project Estimation Based on FP Counts
[ EXP ]	Expert System that Assist with FP Counting (Type 2 Tool - IFPUG)
[ GUIDE ]	FP Counting Guidance
[ MANA ]	Measures / Metrics Analysis: Risk - Value - Quality - Defect - Reliability - Financial ...
[ MTRACK ]	Measures / Metrics Tracking
[ PROD ]	Productivity Analysis
[ RELI ]	Reliability Analysis
[ RISK ]	Risk Analysis
[ SCHED ]	Project Scheduling: Activities, Staff, Resources ...
[ SIZE ]	Software Sizing
[ TRACK ]	Tracking
[ TRADE ]	Re-Planning: Tradeoff Analysis
[ TRAIN ]	FP Individual Training: FP concepts tutorial
[ TREND ]	Trending
[ VALUE ]	Value Analysis
[ WHAT ]	What-If Analysis

## FP Tool: Classification Grid (Taxonomy)

FP Tool	Tool Category
<b>Project Planning</b>	<b>[ 0 ]</b>
<b>FP Data Collection and Calculation</b> IFPUG Type ①	<b>[ 1 ]</b>
<b>Expert System that Assist with FP Counting</b> IFPUG Type ②	<b>[ 2 ]</b>
<b>Automatic FP Counting</b> IFPUG Type ③	<b>[ 3 ]</b>
<b>Sizing</b> (high level)	<b>[ 4 ]</b>
<b>Estimation / Prediction</b> (based on FP counts) Risk: [5-A]   Productivity: [5-B]   Quality: [5-C]   Value: [5-D] ...	<b>[ 5 ]</b>
<b>Project Management</b> (scheduling, tracking, control )	<b>[ 6 ]</b>
<b>Software Measures Repository</b>	<b>[ 7 ]</b>
<b>Evaluation</b> (assessment & comparisons)	<b>[ 8 ]</b>
<b>Training</b> (FP concepts tutorial)	<b>[ 9 ]</b>
<b>FP Documentation</b> (computer based supports)	<b>[ 10 ]</b>

## Distribution by Type

FP Tool Classification	Total
[ 0 ] Project Planning	9*
[ 1 ] FP Data Collection and Calculation	6
[ 2 ] Expert System that Assist with FP Counting	2
[ 3 ] Automatic FP Counting	8
[ 4 ] Sizing (High Level)	22
[ 5 ] Project Estimating (Estimation & Predictions)	19
[ 5-A ] Risk	13 <sup>†</sup>
[ 5-B ] Productivity	11 <sup>†</sup>
[ 5-C ] Quality	9 <sup>†</sup>
[ 5-D ] Value	6 <sup>†</sup>
[ 6 ] Project Management (Scheduling & Control )	6
[ 7 ] Software Measures Repository	11
[ 8 ] Evaluation ( Assessment & Comparisons )	4
[ 9 ] Training	5
[ 10 ] Documentation	4

\*: Included in sizing and estimation tools

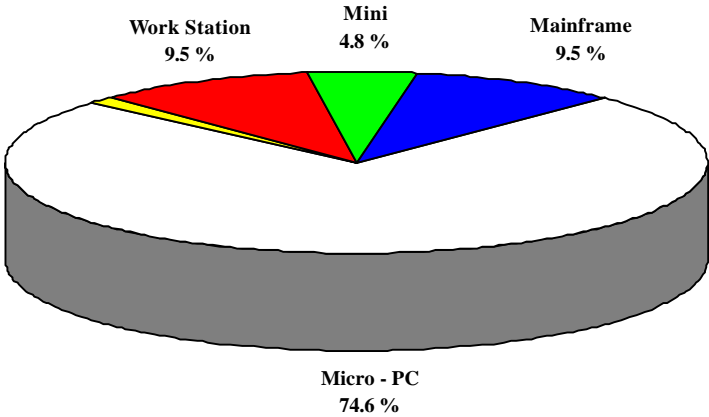

<sup>†</sup>: Included in estimation tools

## Distribution by Country

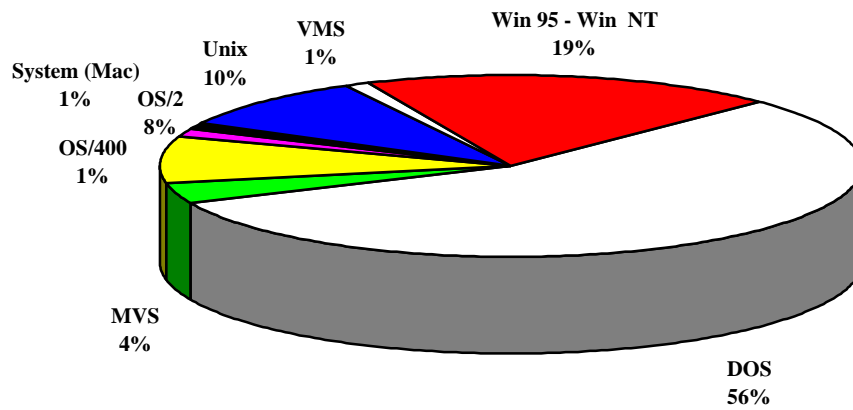

Country	FP Tools
Australia	1
Canada	3
England	2
Finland	1
Germany	1
Italy	2
Uruguay	1
USA	41
<b>Total</b>	<b>52</b>

# Distribution by Platform

Platform	FP Tools
Micro - PC	47
Micro - Macintosh	1
Work Station	6
Mini	3
Mainframe	6

## Distribution by Operating System - Interface

Operating System	FP Tools
DOS	49
MVS	3
OS/2	8
OS/400	1
System (Mac)	1
Unix	8
VMS	1
Win 95 - Win NT	16

## **Detailed Results**

## Product Index

Product	Vendor	Location	Phone
AEM - Adaptive Estimating Mode	Koch Productivity Consulting	Bel Air, MD	(410) 838-8721
Asset - R	Resource Calculations Inc.		
AutoPoint	Integrated Software Specialists Inc.	Schaumburg, IL	(708) 240-5070
Bachman FP Analyst	Cayenne Software Inc.	Burlington, MA	(617) 273-9003 Ext. 490

## FP Tools by Category

### 1. FP Data Collection and Calculation

FP Estimator
FP Manager
FP Workbench
Productivity Manager
PQM <i>Plus</i>
SMART Counter

### 2. Expert System Which Aids with Counting of FPs

CA-FPXPert
PQM <i>Plus</i>

### 3. Automatic FP Counting

AutoPoint
Bachman FP Analyst
Before You Leap (with add-on)
LDA - LINC Development Assistant
Composer 3.0: FP Calculation Report
Micro Focus Revolve
PCA Calc add-on (Prototype)
VIA RECAP: ESW Portfolio Analysis

### 4. Project Sizing (High Level)

Asset R

## Automatic FP Counting Tools

This section summarizes the answers to the three research questions that motivated the present FP tool market survey:

- What are the automatic counting tools (type 3 tools) are currently being marketed ?
- What are the features of these tools ?
- What are the major steps adopted by these tools to perform automatic FP counting ?

### 1 - Automatic FP Counting Tools Currently Being Marketed:

Automatic FP Counting
AutoPoint
Before You Leap with add-on*
Cayenne / Bachman FP Analyst
LDA - LINC Development Assistant
Composer (FP Calculation Report)
Micro Focus Revolve
PCA Calc add-on* (prototype)
VIA RECAP: ESW Portfolio Analysis
<b>Total .... 8</b>

\*: Manual FP tool modified to perform automatic counting

Currently, only AutoPoint, Bachman FP Analyst, Composer, LDA and VIA Recap focus primarily on the problem of reliable automatic FP counting.

AutoPoint is a product bound tightly to the AS/400 architecture (taking advantage of the AS/400 integrated data dictionary). It features automatic detection of application changes (with automatic FP recalculation).

Cayenne FP Analyst (formerly Bachman FP Analyst) calculates FP automatically from Cayenne models. Preliminary estimates can be made early in the development life cycle where requirements are already completed but a fully attributed data flow isn't yet available. Detailed estimates are derived from data flow diagrams built into the Cayenne/Analyst. Users are able to modify functions from the initial interpretations to obtain a more correct model from which to calculate FPs, in addition to adjusting calculations based on the 14 GSC complexity factors. Outputs are in the form of FP reports (summary or detailed) and results can be exported to productivity or estimation tools.

Composer's FP output data is in the form of an FP calculation report. Since the report is completely automated, there is no opportunity, through human interaction, to specify for example, which components should be counted. FP counts are based on the business application model (Entity-Relationship diagram and Dialog Flow / Process Action diagram) stored in the Composer repository.

Unisys's LDA FP output data is also in the form of a report. FP counts are based on the graphical business model stored in the central repository.

VIASOFT's VIA Recap performs automatic FP calculation using the Portfolio Analysis component (part of VIASOFT's ESW suite). In addition to the FP measures it proposes many other metrics, based essentially on lines of code (Halstead, McCabe, McClure, Control Flow Knots). All metrics including FP, are stored in VIASOFT's Application Knowledge Repository. Comparison of one application with other selected applications can be performed, as well as quality assessment and trend analysis.

Before You Leap has a well-established customer base in England, but up to now hasn't had a significant penetration in the North American FP tool market. By means of an add-on, the tool can input data - DFD and ER-D definitions - directly from CASE tools (System Architect - Excelsior - IEW) thereby rendering some phases of the FP counting process automatic.

The Cayenne FP Analyst is still supported following the merge between Bachman Information Systems and Cadre Technologies Inc. The newly merged company - Cayenne - has as its primary interest the object-oriented methodology and the development of OO products, but the original product is still available.

Micro Focus Revolve is primarily a software analysis tool which essentially addresses the programming environment issues: management of very large systems, analysis of changing impacts, walk-throughs etc. It produces a many LOC metrics (Halstead, McCabe, McClure) besides FP, as well as statistics (number of lines, calls to and from, statements associated with code paragraphs etc.)

PCA Calc with the add-on prototype developed by Hydro-Québec (Montreal) works on the same principle as adopted by Before You Leap: automatic data input from CASE tools to a manual FP sizing tool.

## **2 - FP Automatic Counting Tools Features**

A summary of the information available on the primary features of the automatic counting tools is presented in the next exhibit. For the detailed characteristics of these tools, please refer to the corresponding product pages in the Product Information appendices.

### 3 - Majors Steps in the Automatic FP Counting

All information on the automatic FP counting steps was provided directly by the vendors in the form of specific answers to a questionnaire on this issue. The only exception is Cayenne FP Analyst, information about which was derived from product documentation. To date, no information has been obtained on the automated FP counting steps for Unisys LDA and Micro Focus Revolve.

FP Tool	Version	Automatic FP Counting Steps*

- [ 17 ] Compute the value application factor (VAF);
- [ 18 ] Compute the adjusted FP count.

\*: Based on the Technical Report - **The Methodology of Function Point Analysis** - by K. Paton and A. Abran (94)

## Other FP Tools Recently Identified

- **BIS / Estimator**
- **Estimator's Workbench**
- **IEW Information Engineering Workbench** - Knowledgeware
- **Oracle I-CASE (FP Report module)** - Oracle Corporation
- **PMS/Bridge**
- **Simpact Estimator**
- **SoftCost-R**
- **Venturi** - Int. Software Benchmarking Standard Group - ISBSG (Australia)

We are currently in the data-gathering stage for these FP tools. Their features will be included in the next revision of the FP tool product information report

### Product Identification:

---

**Product Name:** AEM - Adaptive Estimating Model

**Current Version:** v ...

**Vendor:** Koch Productivity Consulting - KPC

814 Pecan Court

Bel Air, MD 21014

USA

Tel: (1) (410) 838-3310

Fax: (1) (410) 265-0889

**Developed by:** Koch Productivity Consulting ( 91 )

10 Parsonage Road, Suite 212

Edison, NJ 08837

USA

**Goal:** ESTIMATION

**Main Category:** Project Development Estimation Tool [ EST ]  
Analysis: Productivity [ PRO ] - Quality [ QUA ]  
Client Satisfaction [ SATIS ] - Risk [ RISK ]

**Secondary Class:** Evaluation: Benchmarking [ BENCH ]

### Technical Characteristics:

---

**Host Environment:**

System Classes: Micro PC Compatible 386+

**Operating Environment:** DOS 3.3+

**Interface:** Windows 3.1

### Tool Features:

---

**Primary Features:**

- ◆ Management-oriented tool for application system project development estimation
- ◆ Risk analysis
- ◆ Quality and customer satisfaction tracking
- ◆ Benchmarking: normalized cross-industry comparative analyses
- ◆ Feedback on performance - productivity - quality - customer satisfaction - risk
- ◆ Employs analytical processes throughout and is adaptable to each user's environment

**Accessory Features:**

- ◆ Graphical management reports
- ◆ Report results by project - year - yearly trend - client organization

### Pricing Structure:

---

**Price Range:** [ USD ... - 18,000 ] List price for a site license

### Product Identification:

---

**Product Name:** Auto Point  
**Current Version:** v1

**Vendor:** Integrated Software Specialists, Inc.  
1701 East Woodfield Road, Suite 911  
Schaumburg, IL 60173  
USA  
Tel: (708) 240-5070  
Fax: (708) 240-5073

**Developed by:** Integrated Software Specialists, Inc.

**Goal:** **SIZING**

**Main Category:** Automatic FP Counting and Data Collection [ AUT ]  
**Secondary Class.:** None

### Technical Characteristics:

---

**Host Environment:**

Targeted Platforms: Client Stations: 386+  
Server : IBM AS/400 - S/36 - S/38

**Operating Environment:**

Client Stations: MS/DOS  
Server : OS/400 v2.3

**Interface:**

Client Stations: Windows 3.1  
Server : Character-based

### Tool Features:

---

**Primary Features:**

- ◆ Automatic FP counts for new projects and applications / legacy code
- ◆ Automatic FP data collection

**Accessory Features:**

- ◆ Automatic detection of application changes (project enhancements / changes): FP recalculation
- ◆ Product is bound tightly to the AS/400 architecture (taking advantage of the AS/400 integrated data dictionary)

### Pricing Structure:

---

**Price Range:** [ USD 46,280 One AS/400 & One PC - USD 668 / For each additional Client Station ]

### Product Identification:

---

**Product Name:** Bachman/Cayenne FP Analyst  
**Current Version:**

**Vendor:** Cayenne Software, Inc.  
8 New England Executive Park  
Burlington, MA 01803 USA  
Tel: (1)(617) 273-9003 Ext. 490  
Fax: (1)(617) 229-9904

**Developed by:** formerly **Bachman Information Systems, Inc.**

**Goal:** **SIZING**

**Main Category:** **Automatic FP Counting and Data Collection [ AUT ]**  
**Secondary Class.:** **None**

### Technical Characteristics:

---

**Host Environment:**  
System Classes: **Micro PC Compatible**  
Targeted Platforms: **386+**  
**Operating Environment:** MS-DOS  
**Interface:** Windows 3.1 +

### Tool Features:

---

#### Primary Features:

- ◆ Automatic FP counts for new projects and applications
- ◆ Detailed mode: calculates FPs automatically from Bachman/Cayenne data flow diagrams built into the Cayenne/Analyst (takes as input an export file from GroundWorks (.var) )
- ◆ Preliminary mode: allows preliminary estimates early in the development life cycle where requirements are already completed but a fully attributed data flow isn't yet available
- ◆ Allows addition, deletion or editing of functions from the initial interpretations to obtain a more correct model from which to calculate FPs
- ◆ Identifies and weights data and transactional functions based on analysis of data elements and entities referenced by data flows
- ◆ Allows adjustment of calculations based on the 14 GSC complexity factors

#### Accessory Features:

- ◆ Provides consistent FP analysis based on IFPUG standards
- ◆ Produces standard summary and detail reports
- ◆ Exports results to productivity or estimation tools

### Pricing Structure:

---

**Price Range:** [ USD .... - .... ] Call for price list

**Product Name:** Before You Leap  
**Current Version:** v 1.52

**Vendor:** Strategic Systems Technology Ltd  
14 Landons Close  
Jamestown Harbour  
Prestons Road  
London E14 9QQ Tel: (44) (0) (171) 538-8228  
England Fax: (44) (0) (171) 515-3887

**Developed by:** Strategic Systems Technology Ltd

**Goal:** **SIZING - ESTIMATION**  
**Main Category:** **Sizing High-level [ SIZE ]**  
**Automatic Counting [ AUT ] (with an add-on)**  
**Estimation of Effort - Duration - Staff - Cost [ EST ]**  
**Risk Assessment [ RISK ] - Productivity Analysis [ PROD ]**  
**Secondary Class.:** None

### Technical Characteristics:

---

**Host Environment:**  
System Classes: **Micro PC Compatible 386+**  
**Operating Environment:** MS-DOS 3.3+  
**Interface:** Windows 3.1 & 95

### Tool Features:

---

#### Primary Features:

- ◆ Parametric software estimating tool for development and maintenance
- ◆ Size estimation methods: COCOMO (SLOC) - IFPUG /FPA (FP) - EFPUG/Symons (Mark II FPA)
- ◆ Estimates: effort - schedule - staff size - cost - productivity
- ◆ What-If analysis: development of alternate scenarios for design trade-offs and scope changes
- ◆ schedule & staff planning
- ◆ Risk Analysis
- ◆ COCOMO cost drivers: development and maintenance models
- ◆ Automatic estimate recalibration based on project actuals
- ◆ Automatic FP counting using add-on for data importation from CASE tools (£ 795):  
IEW - System Architect - Excellerator - SSADM

#### Accessory Features:

- ◆ FP - SLOC conversion: backfiring
- ◆ Exports data to project management tools
- ◆ Windows DDE links to other applications

### Pricing Structure:

---

**Price Range:** [ £ 795 - £ 1,395 ] List price for a single license copy and site license

### Product Identification:

---

**Product Name:** CA-Estimacs  
**Current Version:** v7.1 ( released in February, '95 )

**Vendor:** **Computer Associates International, Inc.**  
Fort Lee Executive Park  
Two Executive Drive Tel: (1) (201) 585-6734  
Fort Lee, NJ 07024 USA

**Developed by:** **Howard Rubin & Associates**  
5 Winter Bottom Lane  
Pound Ridge, NY 10576 USA

**Goal:** **ESTIMATION**  
**Main Category:** **Estimation of Effort - Duration - Staff - Cost [ EST ]**  
**Analysis: Risk [ RISK ] - What-If [ WHA ] - Financial [ FIN ]**  
**Corporate Value [ VAL ]**  
**Secondary Class.:** **Evaluation: Baselineing [ BASE ]**

### Technical Characteristics:

---

**Host Environment:**  
System Classes: **Micro PC Compatible 286+**

**Operating Environment:** MS-DOS 3.3+

**Interface:** Character-based

### Tool Features:

---

#### Primary Features:

- ◆ **Estimates: Effort - Duration - Cost - Staff**
- ◆ Estimation of total effort: based on ansoftwareers of 25 high-level questions: client's organization, project's general size, sophistication and complexity (customizable)
- ◆ Duration - staffing requirements - cost estimations are derived from total effort estimation
- ◆ What-If analysis: development of alternate scenarios for design trade-offs and scope changes
- ◆ Portfolio analysis: cumulative staffing requirements, cost, risks, for a chosen collection of projects
- ◆ Risk analysis - corporate value analysis
- ◆ FP Calculator: FP sizes can be derived for productivity measurement and tracking
- ◆ **Financial Analysis:** month-by-month cash-flow, break-even point, rate of return, net present value

#### Accessory Features:

- ◆ Module of CA-Project Navigation suite: CA-Planmacs, CA-Estimacs, CA-Metrics, CA-SuperProject
- ◆ Compatible with a variety of lifecycle methodologies - Lifecycles: up to 32 phases
- ◆ Templates: large project - small project - maintenance project
- ◆ Statistical database: 18,000+ completed projects
- ◆ Interfaces with CA-Planmacs for project-integrated estimating and planning - ASCII format transfer

### Pricing Structure:

---

**Price Range:** [ USD 24,260 - 70,040 ] List price for a single license copy and site license

Pound Ridge, NY 10576 USA  
  
**Goal:** **SIZING**  
**Main Category:** **Expert System that Assists with FP Counting [ EXP ]**  
**Secondary Class.:** **Guidance [ GUIDE ]**

## Technical Characteristics:

---

**Host Environment:**  
System Classes: **Micro PC Compatible 286+**  
**Operating Environment:** MS-DOS 3.3+  
**Interface:** Character-based  
**Network Capability:** Novell Netware

## Tool Features:

---

### Primary Features:

- ◆ Knowledge-based FP counting, analysis, tracking and measurement tool
- ◆ On-line assistant: provides a tutorial for the FPA method; guides the user through the key steps in the counting process
- ◆ Repository for FP counts created at various points in the development lifecycle
- ◆ Tracks system changes / enhancements through the FP baseline variation
- ◆ Analyzes and Reports FP Trends for a single project or portfolio

### Accessory Features:

- ◆ Version Control: maintains historical versions of a system's FP counts
- ◆ Converters: FP to SLOC (and vice-versa), IFPUF FP to Mark II FP (and vice-versa)
- ◆ Module of CA-Project Navigation suite: CA-Planmacs, CA-Estimacs, CA-Metrics, CA-SuperProject
- ◆ Exports FP data for CA-Metrics to integrate with other key dimensions: cost, staffing levels, timeliness of delivery, functional quality, technical quality, customer satisfaction, etc.
- ◆ Entity-Relationship and Data Flow diagrams can be used as input to the counting process
- ◆ Exports FP data in ASCII Format

## Pricing Structure:

**Product Name:** CA-Metrics

**Current Version:** v3.0 ( released in January, '95 )

**Vendor:** **Computer Associates International, Inc.**  
Fort Lee Executive Park  
Two Executive Drive Tel: (1) (201) 585-6734  
Fort Lee, NJ 07024 USA

**Developed by:** **Howard Rubin & Associates**  
5 WinterBottom Lane  
Pound Ridge, NY 10576 USA

**Goal:** **SOFTWARE METRICS - EVALUATION**

**Main Category:** **Automated Software Metric Collection, Analysis & Reporting [ SWM ]  
Tracking [ MTRACK ] & Trending of SW Metrics Over Time [ MTREND ]  
Analysis: Quality - Defect - Impact - Corporate Value - Productivity  
Evaluation: Baselining [ BASE ] - Benchmarking [ BENCH ]**

**Secondary Class.:** None

### Technical Characteristics:

---

**Host Environment:** Micro PC Compatible 386+

**Operating Environment:** MS-DOS 3.3+

**Interface:** Character-based

### Tool Features:

---

#### Primary Features:

- ◆ Comprehensive metrics repository: is demographics - quality - productivity measures - work profile measures - delivery measures
- ◆ Project assessment: on-line questionnaire to identify application's technical and functional quality tracking & trending: track changes over time (portfolio versions: time and date stamps)
- ◆ Quality assessment: project's technical / functional quality and user satisfaction
- ◆ Defect tracking & analysis: tracking and analyzing problems and defects using the total quality management software (TQM/S) package included
- ◆ Attribute / impact analysis: corporate value analysis
- ◆ Project baselining: quantitative & qualitative project historical data
- ◆ Project benchmarking: compares your application to your portfolio historical data or baseline results of leading is organizations around the world (industry benchmark data)

#### Accessory Features:

- ◆ Module of CA-Project Navigation suite: CA-Planmacs, CA-Estimacs, CA-Metrics, CA-SuperProject
- ◆ Aggregates data over different levels: application - project - business function - organizational area
- ◆ Import - export capabilities: ASCII - CSV - SDF formats

### Pricing Structure:

---

**Price Range:** [ USD 12,180 - 70,040 ] List price for a single license copy and site license

**Product Name:** CheckPoint (also marketed as CheckMark)  
**Current Version:** v2.3

**Vendor:** SPR - Software Productivity Research  
One New England Executive Park Tel: (617) 273-0140 Ext. 110  
Burlington, MA 01803-5005 USA Fax: (617) 273-5176

**Developed by:** SPR - Software Productivity Research (89)

**Goal:** ESTIMATION - EVALUATION  
**Main Category:** Estimation [ EST ], [ ANA ], [ RISK ], [ QUA ], [ VAL ], [ PROD ], [ DEF ]  
Tracking [ TRACK ], Trending [ TREND ]  
Assessment [ ASSESS ], Baselining [ BASE ], Benchmarking [ BENCH ]  
**Secondary Class.:** [ SWM ]

### Technical Characteristics:

---

**Host Environment:**  
System Classes: Micro PC Compatible Work Station  
Targeted Platforms: 386+ HP 7xx 8xx Sun SPARC Motorola MPC  
**Operating Environment:** MS-DOS 3.3+ Unix: HP UX 9.01 SunOS 4.13 SysV R4  
**Interface:** Windows 3.1 Xwindows (X11 r5) Motif 1.1 / 1.2

### Tool Features:

---

#### Primary Features:

- ◆ Estimation tool: software development, conversion, as well as maintenance & enhancements for 20 years. User enters project's profile (nature, class, type, size)
- ◆ Estimation: project's phases - effort - schedule - staff - resources - cost - deliverables - quality - productivity - defects & removal cost/time by knowledge-based prediction
- ◆ Analysis: risk / value - defect & removal - quality - productivity - what-if - technology impact
- ◆ Assessment: process - environment - technology - personnel - strengths & weaknesses (comparison of actual & projected - industry averages or best in class, internal standards)
- ◆ Assessment: comparison of software strengths and weaknesses against industry standards
- ◆ Capture & Tracking: size (IFPUG FP, Feature Points, SCLOC) - effort - duration - cost - staff - defects
- ◆ Analysis: Simulation of complex what-if scenarios (technology impact - risk/value - defect - quality)
- ◆ Measurement: project software metrics data storage and tracking
- ◆ Baselining: The aggregated measures from a representative number of projects can be used as a baseline
- ◆ Benchmarking: Comparison of actual and projected project performance with internal/external projects; Client historical data & Industrial data (over 6,000 software industrial projects)

#### Accessory Features:

- ◆ Supports MIS - systems software - government / defense development process
- ◆ Information level of detail: portfolio - project - phase - activity - task
- ◆ Import - export facilities; exports to spreadsheets & database systems (exports in MS Project MPX format)
- ◆ Templates: Portfolio - Best in Class (for comparisons) Languages Versions: English and French

SPQR / 20 - Software Productivity - Quality - Reliability: Simpler predecessor model (85)

### Product Identification:

---

**Product Name:** Composer FP Calculation Report  
**Current Version:** v 3.0 ( released in November, '95 )

**Vendor:** Texas Instruments  
6620 Chase Oaks Boulevard MS 8504  
Plano, TX 75023 Tel: (214) 575-3689  
USA Fax: (214) 575-4268

**Developed by:** Texas Instruments

**Goal:** **SIZING**

**Main Category:** Automatic FP Counting [ AUT ]  
**Secondary Class.:** None

### Technical Characteristics:

---

**Host Environment:**  
System Class: Mainframe  
Targeted Platforms: IBM

**Operating Environment:** IBM - MVS

**Interface:** Character-based

### Tool Features:

---

#### Primary Features:

- ◆ Automatic FP calculation and data collection
- ◆ FP output data is done in the form of a report: Composer's FP calculation report
- ◆ FP counts are based on the business application model (Entity-Relationship diagram and Dialog Flow / Process Action diagram) stored in the Composer repository

#### Accessory Features:

- ◆ Product was developed to support the intent of IFPUG r4.0
- ◆ Since the report is completely automated, there is no opportunity for human interaction to specify, for example, which components should be counted
- ◆ Accuracy is related directly to the degree of methodology usage. Where the TI methodology is used in its purest form, the report will produce a count very close to the IFPUG 4.0 manual count
- ◆ Product is part of an integrated suite of model-based development tools (not sold separately)
- ◆ FP data can be downloaded from the mainframe to any spreadsheet (.CSV format)

### Pricing Structure:

---

**Price Range:** [ USD .... - .... ] Call for price list

### Tool Features:

---

#### Primary Features:

- ◆ Sizing: SLOC (COCOMO method) & FP
- ◆ Estimation: schedule (for each project phase) - staff size (using COCOMO method)
- ◆ Interactive software estimation tool: allows preliminary estimation at project's initial definition and then produces a more and more accurate forecasts as the project's definition is refined
- ◆ Also supports ADA - COCOMO for ADA projects
- ◆ Calibration of estimates from actual project data
- ◆ Trade-off sensitivity analysis
- ◆ What-If analysis
- ◆ Compares alternative project plans side by side

#### Accessory Features:

- ◆ Graphical management reports

### Pricing Structure:

### Tool Features:

---

#### Primary Features:

- ◆ Enterprise-wide, multi-user, multi-project management tool with project estimating, scheduling & control capabilities
- ◆ Enterprise Architecture Planning: for identifying and describing the resources needed to support the enterprise
- ◆ Information engineering: for project's conceptual data modeling
- ◆ Structured approach: for application development process
- ◆ Includes size estimation module: FP
- ◆ Project scheduling: task - duration - dependencies - resources (staff, material, equipment, cost)
- ◆ Scheduling: variable resource availability, variable task loading, variable task duration
- ◆ Resource analysis: resource calendar - variable resource availability
- ◆ Logical structures: work breakdown - organizational breakdown
- ◆ Cost analysis: cost computation - time capture and accounting
- ◆ Performance analysis / cost reporting: earned value on WBS

#### Accessory Features:

- ◆ Flexibility to use its own development methodology (customizable) or any other
- ◆ On line Tutorial
- ◆ Integration with Microsoft Project

#### Primary Features:

- ◆ Project profiling: Series of questions about the project (design paradigm, application type, CMM level, tools utilized, familiarity of the project team with the tools, methodologies for metrics collection, distribution etc.)
- ◆ Project planning: structuring from the system level to any number of subsystems
- ◆ Project work breakdown structure (WBS)
- ◆ Sizing: High-level (SLOC - FP - predictive object points)
- ◆ Estimation: effort - schedule - staff size - cost
- ◆ Risk assessment
- ◆ Trade-off analysis: evaluation of project's inter-dependencies and constraints (schedule, cost, quality, available staffing)
- ◆ What-If analysis

#### Accessory Features:

- ◆ Direct interface to project management tools (MS-Project)
- ◆ Generation of reports, graphics and MS-Project file from project's WBS plan

SIP Via Flaminia, 189  
00196 Rome Italy

**Goal:** **PLANNING - SIZING - ESTIMATION - MANAGEMENT**  
**Main Category:** **Sizing [ SIZE ]**  
**Estimating [ EST ], Risk [ RISK ]**  
**Secondary Class.:** **Management: Scheduling [ SCHED ]**

### Technical Characteristics:

---

**Host Environment:**  
System Classes: **Micro PC Compatible**  
Targeted Platforms: **386+**  
**Operating Environment:** MS-DOS  
**Interface:** Windows 3.1

### Tool Features:

---

#### Primary Features:

- ◆ Project Planning
- ◆ Estimation: Project size in FP - total effort - cost
- ◆ Early sizing: Applicable very early in the software lifecycle (feasibility study)
- ◆ Scheduling: team size required & duration for each phase
- ◆ Costing: quantify effort using internal productivity standard equations
- ◆ Used for both new development and enhancement projects
- ◆ Evaluates the margin of risk and the associated probability

#### Accessory Features:

- ◆ FP-FAST can be used for both new development and enhancement maintenance projects
- ◆ Project FP Sizing: FP and SLOC (COBOL equivalent)
- ◆ Productivity model: standard & customized (productivity parameters)
- ◆ FP counts: new development and maintenance
- ◆ Contextual help on-line

System Classes: **Micro PC Compatible**  
Targeted Platforms: **386+**

**Operating Environment:** MS-DOS  
**Interface:** Windows 3.1  
**Network Capability:** MS LAN Manager - Windows NT - Novell Netware

### Tool Features:

---

#### Primary Features:

- ◆ FP calculation. Data display in a variety of worksheets. Reporting
- ◆ Access and count a project at various stages during the development process
- ◆ Central repository for FP data

#### Accessory Features:

- ◆ Count data at project and application level
- ◆ Import data from Metrics Manager
- ◆ Merge and copy data from one database to another, sort data to fit requirements, check integrity of imported data
- ◆ Data support: MS- Access
- ◆ Exchange data with Project Bridge Modeler & Metrics Manager (ABT's Project Management Solution)

### Pricing Structure:

**Developed by:** Angel Group

**Goal:** TRAINING  
**Main Category:** Individual FP Training [ TRAIN ]  
FP documentation [ DOC ]  
**Secondary Class.:** FP calculation

### Technical Characteristics:

---

**Host Environment:**  
System Classes: Micro PC Compatible  
Targeted Platforms: 386+  
**Operating Environment:**  
MS-DOS 3.3+  
**Interface:**  
Windows 3.1

### Tool Features:

---

#### Primary Features:

- ◆ Individual FP Training: step-by-step lesson plan
- ◆ Automated hypertext version of IFPUG - CPM v4.0: look-up and reference tool
- ◆ FP calculations: using forms for all project types and application

#### Accessory Features:

- ◆ Project estimation:
  - Estimating in summary form: to convert a system Size (FP) into an estimate of total effort
  - Assessment of risk & contingency factors for estimating
- ◆ Definitions - procedures - rules - hints - diagrams - examples
- ◆ Simultaneous viewing: IFPUG's definitions & rules and applications in examples & cases
- ◆ Search capability: topic - sub-topic - text string - individual word searches
- ◆ Printing capability: topics - subtopics - entire document
- ◆ Angel Group case studies: new development - enhancement & maintenance projects

### Pricing Structure:

---

**Price Range:** [ USD 249 - 1,999 ] List price for a single license copy and 10 users license (special offer)

---

**Host Environment:**

System Classes: **Micro PC Compatible 386+**

**Operating Environment:** **DOS 3.3+**

**Interface:**

**Network:** **Novell, Peer to Peer NetBIOS Comptatible**

### Tool Features:

---

**Primary Features:**

- ◆ Facilitate FP data entry, calculation and reporting
- ◆ Repository for FP data relating to information systems and products
- ◆ Intended to assist in metrics programs by fully supporting FPA
- ◆ Also acts as FP calculator during the entry process
- ◆ Suite of reports to assist in leveraging FP data
- ◆ Not intended to be a counting tutorial or assistant, but will follow the natural flow of the counting process

**Accessory Features:**

- ◆ Data import / export capability
- ◆ Reporting capabilities with graphics
- ◆ On-line reporting viewing
- ◆ Virtually unlimited capacity
- ◆ Context-sensitive help
- ◆ Storage: .dbf format

**Operating Environment:** MS-DOS 3.1+ OS/2  
**Interface:** Win 3.1 - Win 95 - Win NT - XWindows - OS/2 Windows  
**Network Capability:** MS LAN Manager - Win NT - Novell Netware - OS/2 LAN Server

### Tool Features:

---

#### Primary Features:

- ◆ Calculation, storing, maintaining & analyzing FP counts
- ◆ Project / application planning: graphical decomposition (WBS)
- ◆ Tracks and highlights changes in software size

#### Accessory Features:

- ◆ Project attributes: FP count description
- ◆ Context sensitivity: count applies to the system - project - phase
- ◆ Aggregate feature: sums UFP for a number of projects
- ◆ Notes and comments can be attached to any component
- ◆ Labeling feature: functionalities in a project can be tagged
- ◆ Reports: various levels of detail and perspectives
- ◆ Data export: spreadsheet, data-base, graphics package
- ◆ Expert advice and counting rule documentation: IFPUG CPM's counting rules available

**Vendor:** Interfase S.A.  
Bulevar España 2094  
Montevideo Tel: (5982) 49 46 00  
Uruguay Fax: (5982) 49 46 00

**Developed by:** Interfase S.A.

**Goal:** **SIZING - ESTIMATION**  
**Main Category:** **Sizing [ SIZE ]**  
**Estimation [ EST ]**  
**Secondary Class.:** **Planning [ PLAN ] - Tracking [ TRACK ]**

### Technical Characteristics:

---

**Host Environment:**  
System Classes: **Micro PC Compatible**  
Targeted Platforms: **386+**

**Operating Environment:** MS-DOS  
**Interface:** Character-based  
**Network Capability:** Novell Netware

### Tool Features:

---

#### Primary Features:

- ◆ Planning: Project task planning (WBS)
- ◆ Sizing: FP (Analytical method: bottom-up)
- ◆ Uses backfiring to obtain SLOC (Genexus' Cobol & FoxPro)
- ◆ Estimation: total effort - schedule - team size (high level and detailed) - cost
- ◆ Environmental factor modifiers: staff experience - product complexity & delivery schedule
- ◆ Project tracking: completed activities - staff hours - effort expended
- ◆ Software measurement repository: size (FP) - effort - cost - duration - project attributes (staffing - tools - techniques)
- ◆ Version management: historical & alternative estimation versions

#### Accessory Features:

- ◆ Mixed methodology: Function Points (project size estimation) and COCOMO - 5 out 15 cost drivers
- ◆ Interfase's empirical productivity model: determine total effort - schedule - staff
- ◆ COCOMO's Cost Drivers: estimation of project optimal development time
- ◆ Project memo notes ; reports: project - activities - attributes
- ◆ Project work plan: high level and detailed

### Pricing Structure:

---

**Vendor:** Information Technology Development Center (TIEKE)  
Salomonkato 17A, 10 kervos  
00100 Helsinki Tel: (358) (0) 685-1200  
Finland Fax: (358) (0) 685-1616

**Developed by:** Information Technology Development Center (1991)

**Goal:** SIZING - ESTIMATION

**Main Category:** Size [ SIZE ] - Estimation [ EST ]  
Assessment of Quality [ QUA ] - Productivity [ PRO ] - Risk [ RISK ]

**Secondary Class:** None

### Technical Characteristics:

---

**Host Environment:**  
System Classes: Micro PC Compatible 386+  
**Operating Environment:** MS/DOS  
**Interface:** Windows 3.1

### Tool Features:

---

#### Primary Features:

- ◆ Estimation of Size - Effort - Schedule
- ◆ Assessment of project's Productivity - Quality - Risk
- ◆ Sizing model: estimation of software size in FP
- ◆ Effort estimation model:  $effort = a * Size\_in\_FP^b$   $a = a' * \prod p_i$   $p_i$ : Productivity factors (27)
- ◆ Schedule estimation model:  $Time = c * Effort^d$   $c, d$  are estimated from the LATURI database
- ◆ Estimation in different phases of development: feasibility study - specification - design - implementation and testing

#### Accessory Features:

- ◆ LATURI database: 182 projects (109,000 FP)
- ◆ Sample or whole database: Possibility of use to select projects for comparisons - only one's own projects - same size - same business sector - using the same tools, or the whole database
- ◆ Entity -Relationship: input information for the FP sizing module
- ◆ Risk identification / priority
- ◆ Process assessment

**Developed by:** Unisys

**Goal:** **SIZING**

**Main Category:** **Automatic FP Counting and Data Collection [ AUT ]**  
**Secondary Class.:** None

### Technical Characteristics:

---

#### Host Environment:

Targeted Platforms: Client Stations: 386+  
Server : Unisys SMP & U Series, Sun SPARC, RS6000

#### Operating Environment:

Client Stations: MS/DOS  
Server : Unix                      ATT Unix System V compatible

#### Interface:

Client Stations: Windows 3.1  
Server : XWindows

### Tool Features:

---

#### Primary Features:

- ◆ Automatic FP calculation and data collection for new projects and applications
- ◆ FP output data in the form of a report: FP calculation report
- ◆ FP counts are based on the business application model stored in the central repository

#### Accessory Features:

- ◆ Automatic detection of application changes (project enhancements / changes): FP recalculation
- ◆ The report is completely automated there is no opportunity for human interaction to specify, for example, which components should be counted
- ◆ FP data can be downloaded from the mainframe to any spreadsheet
- ◆ Product is part of an integrated suite of model-based development tools (not sold separately)

**Developed by:** Applied Information Development, Inc.  
**Goal:** **SOFTWARE METRICS DATA REPOSITORY**  
**Main Category:** Automated Software Metric Collection, Analysis & Reporting [ SWM ]  
Trending [ MTREND ]  
**Secondary Class.:** Analysis [ MANA ]: Value - Productivity

### Technical Characteristics:

---

**Host Environment:** System Class: Micro PC Compatible 386+  
**Operating Environment:** MS-DOS  
**Interface:** Character-based

### Tool Features:

---

#### Primary Features:

- ◆ Software metrics repository: Automated software metric collection (data gathering)
- ◆ Basic measures supported (1): Size (FP - SLOC) - Effort - Time - Cost - Defect - Failure - Value
- ◆ Fundamental metrics (2): Productivity (FP - SLOC) - Quality - Reliability - Time/Duration - Cost - Performance Value
- ◆ Critical Metric Set (customizable) (3): effectiveness - value - efficiency
- ◆ Attributes: project type - user involvement - manager experience - staff application experience - team technical experience - system availability - system responsiveness - tools - application size & complexity - language - CASE tools - methodology

#### Accessory Features:

- ◆ FP and SLOC sets of data
- ◆ Statistically validation of data using industry database of metrics: careful distinction made between trends and statistically significant correlations
- ◆ Quantitative (project measurements) and qualitative (project attributes) data
- ◆ Trend analysis
- ◆ Import / export project data: ASCII format
- ◆ Reporting

**Host Environment:**  
System Classes: Micro PC Compatible 486+  
**Operating Environment:** DOS  
**Interface:** Windows 3.1 - Windows 95  
**Network:** Any PC-based Client-Server network

### Tool Features:

---

#### Primary Features:

- ◆ Database for collecting work measurements and analyzing work metrics
- ◆ Data import / export to / from Project Bridge Modeler & Project Workbench
- ◆ Repository content: attributes - measures - metrics (values calculated on the basis of 2 or more measures)
- ◆ Measures includes: size, effort, elapsed time, cost, number of defects ...
- ◆ Measures list is customizable
- ◆ Metrics include: productivity, quality, reliability
- ◆ Analysis can be performed at enterprise - department - project levels

#### Accessory Features:

- ◆ Industry database maintained by Computer Power Group can be obtained (against subscription and supplies of customer's own data)
- ◆ Organizations can assess/calibrate their performance against that of others in the industry

### Pricing Structure:

---

**Price Range:** [ USD 7,500 - 15,000 ] ( USD 750 / seat ) List price for a single license copy and site license

**Secondary Class.:** None

### Technical Characteristics:

---

**Host Environment:**

System Classes: **Micro PC Compatible 386+**

**Operating Environment:** MS/DOS 5.0+

**Interface:** Windows 3.1

**Network:**

### Tool Features:

---

**Primary Features:**

- ◆ Can generate all the industry standard metrics including: FP, Halstead, McCabe, McClure (these metrics provide an indication of the application's complexity at both the design and implementation levels)
- ◆ Other statistics include: SLOC, calls to and from, statements associated with code paragraphs

**Accessory Features:**

- ◆ Analysis tool aimed at supporting daily activities performed by programmers
- ◆ Interprets systems with thousands of programs and millions of SLOC
- ◆ Assesses the impact of changes: capability to cross-reference any program component across an entire system and trace data elements as they move through application
- ◆ Ability to walk a test path through code
- ◆ Can generate a series of canned reports that checks for program anomalies
- ◆ Inventory: assesses which software components belong to which application
- ◆ Interface for Micro Focus COBOL Workbench

**Developed by:** QSM - Quantitative Software Management, Inc.

**Goal:** ESTIMATION

**Main Category:** Productivity Assessment: Measure and Productivity Analysis [ PRO ]

**Secondary Class:** Software Metrics Database [ SWM ]

### Technical Characteristics:

---

**Host Environment:**

System Classes: Micro PC Compatible 386+

**Operating Environment:** MS/DOS

**Interface:** Windows 3.1 - Windows 95

**Network:** MS LAN Manager - Win NT - Novell - OS/2 LAN Server

### Tool Features:

---

**Primary Features:**

- ◆ PADS measures productivity based on captured data of completed software development releases
- ◆ Captures metrics on resources, schedule, reliability, tools and methods utilized
- ◆ Supports FP and SLOC
- ◆ Graphically plots completed projects against industry trends
- ◆ Impact analysis: schedule compression on defects and development costs, CASE tool utilization etc.

**Accessory Features:**

- ◆ Knowledge base: over 1500 industry completed projects for productivity benchmarking
- ◆ Captures data from completed software developments or releases
- ◆ Extracts data according to any set of conditions
- ◆ Inputs data automatically from SLIM Control to update the custom database of historical projects
- ◆ Outputs data in ASCII format
- ◆ Integrates the SLIM software metrics tool suite: SIZE Planner - SLIM - SLIM Control

**Goal:** **SIZING - ESTIMATION**  
**Main Category:** **Automatic FP Counting and Data Collection [ AUT ]**  
**Secondary Class.:** **Estimation [ EST ]**

### Technical Characteristics:

---

**Host Environment:**  
System Classes: **Micro PC Compatible 386+**

**Operating Environment:** MS/DOS 5.0+  
**Interface:** Windows 3.1  
**Network:** No

### Tool Features:

---

#### Primary Features:

- ◆ PCA-Calc is an FP data collection and calculation tool (type 1)
- ◆ Hydro-Québec's add-on ensures a direct data input link with a CASE tool (ASYST's Développeur)
- ◆ It also automates the recognition of data and transactional function types from a DFD & E-R diagram
- ◆ PCA-Calc with the add-on automatically derives FP counts for new projects and applications
- ◆ Inputs information from a CASE Tool's Data Flow Diagram & Entity Relationship Model
- ◆ Based on the FP size and cost factors, the prototype estimates the project's effort (total) and cost

#### Accessory Features:

- ◆ Calibration is made using Hydro-Québec's database of completed projects
- ◆ PCA-Calc tool was built around a Lotus 123 spreadsheet; the add-on was written in Turbo C
- ◆ Historical FP counts are stored using Lotus (.wks) flat files

### Product Identification:

---

**Product Name:** Productivity Manager  
**Current Version:** v3.5 ( released in October, '95 )

**Vendor:** Productivity Management Group, Inc.  
160 Lawrence Bell Drive, Suite 122  
Williamsville, NY 14221 - 7897 Tel: (716) 633-0621  
USA Fax: (716) 633-1880

**Developed by:** Productivity Management Group, Inc .

**Goal:** **SIZING - ESTIMATION - SOFTWARE MEASUREMENT**

**Main Category:** **FP Data Collection (Repository) and Calculation [ DCC ]**  
**Estimation [ EST ]**  
**Software metric collection, analysis & reporting [ SWM ]**  
**Tracking [MTREND ] - Trending [MTRACK ]**

**Secondary Class:** **Planning [ PLAN ] - Guidance [ GUI ]**

### Technical Characteristics:

---

**Host Environment:**  
System Classes: **Micro PC Compatible 386+**

**Operating Environment:** DOS

**Interface:** Windows 3.1 - Windows 95

**Network:** Network and Client-Server supported

### Tool Features:

---

#### Primary Features:

- ◆ Planning: Produce a complete WBS
- ◆ Sizing: FP calculation and count repository (Type 1 tool)
- ◆ Estimation: time - cost - defects - staff
- ◆ Measurements repository: size- time - cost - defects - staff - tools - techniques, environment inf.
- ◆ Tracking: project size, time, cost, defects, attributes: team, tools, techniques, environment
- ◆ Trending: identify trends concerning project/application changes over time

#### Accessory Features:

- ◆ Guidance: counting wizard provides guidance through the steps for applying counting models to produce an estimated project count (pre-defined models or define your own models):
- ◆ Project planning wizard: guide to producing a complete Work breakdown structure
- ◆ Information level: executive - organization - responsibility center - project - application
- ◆ Over 100 pre-formatted reports: project - application - administration reports
- ◆ Open architecture: query data with any query tool of your choice
- ◆ Transfer information to project management software: to create project plans & schedules

### Pricing Structure:

---

**Price Range:** [ USD 4,900 - 49,000 ] List price for a single license copy and site license (10+ concurrent users)

**Host Environment:**  
System Classes: **Micro PC Compatible 386+**  
**Operating Environment:** DOS 3.3+  
**Interface:** Windows 3.1  
**Network:** Any PC-based Client-Server network

### Tool Features:

---

#### Primary Features:

- ◆ Project profiling: Project size (PF) - Risk evaluation - Environmental factor evaluation
- ◆ Planning: build and fine-tune the plan with a work breakdown structure (WBS) (customizable)
- ◆ Project estimation: size effort - schedule - staff
- ◆ Estimating techniques: top-down (analogical) and bottom-up (analytical)
- ◆ Refine estimates based on actual performance to date from project workbench
- ◆ Project evaluation: what-if analysis

#### Accessory Features:

- ◆ Support third-party methodologies
- ◆ On-line access to methodology guidelines in hypertext
- ◆ Integration with metrics manager: client's projects and industrial database
- ◆ Integration with Project Workbench for scheduling, tracking, analysis and reporting
- ◆ Application development methodology: 15 templates for different types and sizes of projects

### Pricing Structure:

System Classes: Micro PC Compatible 386+  
**Operating Environment:** DOS 3.3+  
**Interface:** Windows 3.1  
**Network:** Any PC-based Client-Server network

### Tool Features:

---

#### Primary Features:

- ◆ Project Scheduling: task - duration - dependencies - resource assignment: staff, material, equipment, cost
- ◆ Scheduling: variable resource availability, variable task loading, variable task duration
- ◆ Planning and schedule estimations can be imported from proj. bridge modeler or created directly
- ◆ Evaluation of alternatives: what-if analysis
- ◆ Measurement & tracking: task status - percent complete - estimate to complete
- ◆ Project analysis & reporting: variance reporting - earned value analysis

#### Accessory Features:

- ◆ Management of multiple projects: master / subproject and aggregation features
- ◆ Roll-up feature: detailed and summary-level views
- ◆ View library: executive - project manager - team member
- ◆ Integration with Project Bridge Modeler to modeling, planning and estimating
- ◆ Integration with Metrics Manager: analysis of data at project, department, enterprise levels
- ◆ Guidance: on-line tutorial

**Product Name:** SEER - SSM SEER - Software Sizing Model  
**Current Version:** v 1.18 ( released in August, '95 )

**Vendor:** GA SEER Technologies  
Division of Galorath Associates, Inc.  
PO Box 90579  
Los Angeles, CA 90009-0579 Tel: (310) 670-3404  
USA Fax: (310) 670-6481

**Developed by:** Target Software

**Goal:** **SIZING**

**Main Category:** **Sizing [ SIZE ]**

**Secondary Class.:** None

### Technical Characteristics:

---

**Host Environment:**  
System Classes: Micro PC Compatible 386+

**Operating Environment:** MS/DOS

**Interface:** Windows 3.1 - Windows 95

**Network:** MS LAN Manager - Win NT

### Tool Features:

---

#### Primary Features:

- ◆ Upper End Tool: sizes by analogy, based on a database of completed projects
- ◆ Size Estimation: FP and executable LOC
- ◆ Poses a sequence of questions that cause the user to compare the components (modules) of the project to others in the database.
- ◆ SSM using the comparison algorithm, converges to the most likely sizes for components and for the whole system
- ◆ Based on work of George Bozoki: estimation of absolute sizes and relative sizes (based on qualitative data available at the project's proposal stage)
- ◆ Outputs data to SEER - Software Evaluation Model

#### Accessory Features:

- ◆ Project elements are organized into a work breakdown structure (WBS)
- ◆ Knowledge-based industrial use for comparisons. Also accept a custom historical database

### Pricing Structure:

System Classes: Micro PC Compatible 386+ Macintosh Workstation SUN  
**Operating Environment:** MS/DOS System 6.08+ Unix  
**Interface:** Windows 3.1 - Windows 95  
**Network:** MS LAN Manager - Win NT

### Tool Features:

---

#### Primary Features:

- ◆ Estimations: effort - schedule - staff - defects - cost (labor hours or currency) - risk - defects & maintenance - reliability
- ◆ Parametric estimation: input parameters - 16 categories including predicted size, complexity, personnel capabilities, development environment, schedule, staffing, maintenance environment, etc.
- ◆ The underlying estimation equations are open. Model is calibrated with project data - knowledge base: industrial data from North American and European sources

#### Accessory Features:

- ◆ Environment and application: addresses any development environment and knowledge bases
- ◆ Input parameters: size - personnel - environment - complexity - constraints
- ◆ Estimation: top-down & bottom-up (object based) approaches
- ◆ Staffing profile: takes into account minimum time, minimum staff or both (multiple staffing constraints possible)
- ◆ Impact analysis: for specific project factor adjustment
- ◆ Identification of cost drivers: top ten cost drivers
- ◆ Work breakdown structure (WBS): project elements
- ◆ Knowledge-based industrial database of completed projects

**Secondary Class.:** DOCUMENTATION

### Technical Characteristics:

---

**Host Environment:**  
System Classes: Micro PC Compatible 386+

**Operating Environment:** MS/DOS 3.0+  
**Interface:** Windows 95  
**Network:** Yes

### Tool Features:

---

#### Primary Features:

- ◆ Early FP estimation: feasibility study
- ◆ Estimation: size, effort, schedule, cost (total and by project phase)
- ◆ Delphi method used to build a consensus toward an early estimated value
- ◆ The LAN Module configures SFERA as groupware: enabling participation of remote stations
- ◆ Puts the participants in communication
- ◆ Data gathering and statistical computations

#### Accessory Features:

- ◆ Customizable
- ◆ Exports results to other productivity or estimations tools
- ◆ Exports data to MS Project - MS Excel

### Pricing Structure:

**Secondary Class:** None

### Technical Characteristics:

---

**Host Environment:**

System Classes: Micro PC Compatible 386+

**Operating Environment:** MS/DOS

**Interface:**

### Tool Features:

---

**Primary Features:**

- ◆ Estimates software development project size
- ◆ Encompasses 16 methods grouped into 4 general techniques for estimating the size of software development Techniques for size estimation
- ◆ Fuzzy Logic: rough estimates on simple parameters. Combines intuitive guesses of technical people with statistical characteristics of over 1500 completed projects to produce an SLOC estimate
- ◆ Function Points: evaluates the project size in FP (SLOC can be derived)
- ◆ Standard Components: Twelve independent size indicators ranging from low level (SLOC, screen reports) to high level (modules, subsystems). estimates the low, most likely and high for each component
- ◆ New, modified and reused components: estimates the effective SLOC that will require work. Uses as input: amount of reused code, unchanged code, retested code, modified code, block deletions

**Accessory Features:**

- ◆ Statistical processes to reduce uncertainty: Bayesian weighting & exponential smoothing
- ◆ Modular: outputs data to SLIM tool suite: SLIM - SLIM Control - SLIM Metrics
- ◆ Can be used with any resource or scheduling tool that uses FP or SLOC

**Host Environment:**

System Classes: Micro PC Compatible 386+

**Operating Environment:** MS/DOS

**Interface:** Windows 3.1 - Windows 95

**Network:** MS LAN Manager - Win NT - Novell - OS/2 LAN Server

### Tool Features:

---

**Primary Features:**

- ◆ Planning and Resource & Scheduling Estimation Tool for software development
- ◆ Estimates: size, total effort - duration - staffing - costs - defects for a software development project
- ◆ Estimates based on the work of Raleigh-Norden curve, calibrated with the vendor's database of completed projects
- ◆ What-If analysis: different stored estimate scenarios can be compared side by side
- ◆ Assessment: compares the project plan against records of previous completed projects
- ◆ Planning scenarios: stores - analyses - compares different staffing levels - resources - desired reliability - schedules
- ◆ Productivity & risk analysis
- ◆ Software reliability forecasting: mean time to failure

**Accessory Features:**

- ◆ Repository: custom software metrics and industry projects databases
- ◆ Knowledge database (industry averages): over 2800 completed projects
- ◆ Expert system technology: determines default parameters from the repository of stored records
- ◆ Outputs data to SLIM Control: tracking, management and reporting tool

### Pricing Structure:

**Vendor:** **QSM - Quantitative Software Management, Inc.**  
2000 Corporate Ridge, Suite 900  
McLean, VA 22102 Tel: (703) 790-0055  
USA Fax: (703) 749-3795

**Developed by:** **QSM - Quantitative Software Management, Inc.**

**Goal:** **MANAGEMENT**  
**Category:** **Controlling: Tracking [ TRACK ], Analysis [ ANA ], Control [CTRL ]**  
**Secondary Class:** **Software metrics [ SWM ]**

### Technical Characteristics:

---

**Host Environment:**  
System Classes: **Micro PC Compatible 386+**  
**Operating Environment:** MS/DOS  
**Interface:** Windows 3.1 - Windows 95  
**Network:** MS LAN Manager - Win NT - Novell - OS/2 LAN Server

### Tool Features:

---

#### Primary Features:

- ◆ Process Management and Control: Periodically measures (actuals) are compared to the project's development plan and evaluated to see if re-planning is called for
- ◆ Statistical control techniques are used to monitor software development progress: if needed, alternatives can be evaluated and the most consistent new plan generated automatically
- ◆ Basic set of metrics collected on a monthly basis: effort - defects - milestones - SLOC or FP
- ◆ Customization: Up to 20 metrics can be created over and above the basic set provided in SLIM-Control
- ◆ Assessment: Traffic-lights identify quickly when a project is under control or requires corrective action
- ◆ Control: Statistical boundaries establish the thresholds that will trigger the traffic-light assessment
- ◆ Simulated forecasts: inputs anticipated performance levels and analyzes what impact this has on the forecasts

#### Accessory Features:

- ◆ Configurable analysis view: up to 16 on the screen at one time
- ◆ Customization of the software life-cycle: creates and stores any lifecycle paradigm
- ◆ Monthly or weekly reporting: selects the appropriate reporting cycle
- ◆ Repository: up to 20 plans and / or forecasts can be stored
- ◆ Inputs data from SLIM Control: tracking, management and reporting tool
- ◆ Outputs data to SLIM Metrics: software metrics repository, analysis and reporting tool

certified tool

**Current Version:** v 2.0A ( released in January, '95 )

**Vendor:** DDB Software Inc.  
1935 Salt Myrtle Lane  
Orange Park, FL 32073  
USA

Tel: (904) 213-9836

Fax: (904) 215-0444

**Developed by:** DDB Software Inc.

**Goal:** SIZING

**Main Category:** FP Data Collection and Calculation [ DCC ]

**Secondary Class.:** None

### Technical Characteristics:

---

**Host Environment:**

System Classes: Micro PC Compatible

Targeted Platforms: 386+

**Operating Environment:** MS-DOS

**Interface:** Windows 3.1 - Windows 95

### Tool Features:

---

**Primary Features:**

- ◆ FP data collection (repository) and calculation (type 1 tool: IFPUG classification)
- ◆ The tool conforms to the IFPG CPM r4.
- ◆ Counts data at application / project level - Tracks all enhancements

**Accessory Features:**

- ◆ Guidance: SMART Counter follows a logical counting sequence
- ◆ Repository: MS-Access database
- ◆ Help for FP counting method: not available
- ◆ Data import (from spreadsheets) and export (default extension: .CDF)
- ◆ Free-form notes: Application information
- ◆ Reports: application report & project report - report preview - summary & detail
- ◆ Module of SMART tool line

### Pricing Structure:

---

**Price Range:** [ USD 595 - ... ] List price for a single license copy

### Product Identification:

---

**Product Name:** **SMART Data** Software Measurement Data Repository  
Software Measurement Analysis and Reporting Tool (SMART) Suite

**Current Version:** v ...

**Vendor:** **DDB Software Inc.**  
1935 Salt Myrtle Lane  
Orange Park, FL 32073  
USA  
Tel: (904) 213-9836  
Fax: (904) 215-0444

**Developed by:** **DDB Software Inc.**

**Goal:** **SOFTWARE METRICS DATA REPOSITORY**  
**Main Category:** **Software Measurement Data Repository [ SWM ]**  
**Secondary Class.:** **None**

### Technical Characteristics:

---

**Host Environment:**  
System Classes: **Micro PC Compatible**  
Targeted Platforms: **386+**

**Operating Environment:**  
MS-DOS

**Interface:**  
Windows 3.1 - Windows 95

### Tool Features:

---

#### Primary Features:

- ◆ Software measurement data repository
- ◆ Partitioned along project and application
- ◆ Provides both an industry and a client database repository

#### Accessory Features:

- ◆ Imports industry measurement data (permits periodic updates of industry data)
- ◆ Application / project data: size, effort, schedule, defects, costs, SEI levels, variables, unique client data
- ◆ Interface to all SMART products
- ◆ Populates via screen input or import capability
- ◆ On-line help

### Pricing Structure:

### Product Identification:

---

**Product Name:** **SMART Risk** Project Estimator  
Software Measurement Analysis and Reporting Tool (SMART) Suite

**Current Version:** **v 1.0**

**Vendor:** **DDB Software Inc.**  
1935 Salt Myrtle Lane  
Orange Park, FL 32073  
USA  
Tel: (904) 213-9836  
Fax: (904) 215-0444

**Developed by:** **DDB Software Inc.**

**Goal:** **PROCESS ASSESSMENT - ESTIMATION**

**Main Category:** **Estimation [ EST ] - Assessment and Comparisons [ EVAL ]**  
**Analysis: Productivity [ PROD ]**

**Secondary Class.:** **Benchmarking [ BENCH ] - Baselineing [ BASE ]**

### Technical Characteristics:

---

**Host Environment:**  
System Classes: **Micro PC Compatible**  
Targeted Platforms: **386+**

**Operating Environment:**  
MS-DOS

**Interface:**  
Windows 3.1 - Windows 95

### Tool Features:

---

#### Primary Features:

- ◆ Estimates: total effort - defect total - productivity rates - costs
- ◆ Software process assessment and evaluation
- ◆ Process comparison to best in class practices
- ◆ Project profile and project comparative analysis
- ◆ Import or direct entry of size (FP or SLOC) and other project variables (language, skill levels, technology, process methodology)
- ◆ Exports estimated productivity values
- ◆ Utilizes industry data or client baseline data or some combination of these values to derive estimates

#### Accessory Features:

- ◆ Performs various what-if analyse
- ◆ Displays individual projects relative to client baseline or industry data
- ◆ On-line help

### Product Identification:

---

**Product Name:** Synergy

**Current Version:** v ...

**Vendor:** **CMD Corporation**  
51 Monroe, Suite 1700  
Rockville, MD 20850  
USA

Tel: (301) 738-8835

Fax: (301) 738-8803

**Developed by:** **CMD Corporation**

**Goal:** **PLANNING - SIZING - ESTIMATION - MANAGEMENT**

**Main Category:** **Sizing (High-level) [ SIZE ] - Estimation [ EST ]**

**Analysis: Risk - Cost/Benefits - Problems**

**Management: Resource Assignment - Tracking (Products & Metrics)**

**Secondary Class.:** **SOFTWARE MEASUREMENT [ SWM ]**

### Technical Characteristics:

---

#### Host Environment:

System Classes: **Micro PC Compatible**

Targeted Platforms: **386+**

**Operating Environment:** MS-DOS

**Interface:** Windows

### Tool Features:

---

#### Primary Features:

- ◆ Planning: create - manage - customize development path definitions (wich reflect the best practices)
- ◆ Sizing (high-level) in fp: new development and enhancement projects
- ◆ Estimation: effort (top-down, bottom-up, function point techniques)
- ◆ Risk assessment; cost / benefit analysis
- ◆ Problem tracking and reporting: problem with deliverables, assignment, project plans, standards, etc.
- ◆ Resources assignment: assignes resource roles and responsibilities to tasks
- ◆ Capture, tracking and reporting on metrics; estimates & actuals can be used to refine estimates
- ◆ Capture and tracking of work products; sharing and management of deliverables

#### Accessory Features:

- ◆ Store and indexes organization's standards, techniques and any other reference material
- ◆ Changes request tracking / management facility
- ◆ Bi-directional interface to project management tools to develop project scheduling
- ◆ Full e-mail support

### Product Identification:

---

**Product Name:** VIARECAP Portfolio Analysis  
**Current Version:** v2.1 ( released in September, '95 )

**Vendor:** VIASOFT, Inc.  
3033 North 44th Street  
Phoenix, AZ 85048 USA

**Developed by:** VIASOFT, Inc.

**Goals:** **SIZING - SOFTWARE METRICS DATA REPOSITORY**

**Main Category:** Automatic FP counting [ AUT ]  
**Secondary Class.:** Automated Software Metrics Collection, Analysis & Reporting [ SWM ]  
Quality Assessment [ QUA ]

### Technical Characteristics:

---

**Host Environment:**

System Class: Mainframe IBM  
Optional PC Stations: 386+ instead of 3270 terminals (VIA / Recap 2)

**Operating Environment:**

IBM - MVS / XA or MVS / ESA  
Optional PC Stations: OS /2 2.0+ (VIA / Recap 2)

**Interface:**

Character-based  
Optional PC Stations: OS /2 Windows (VIA / Recap 2)

### Tool Features:

---

**Primary Features:**

- ◆ Automatic FP calculation using Portfolio Analysis component (integrates VIASOFT's ESW suite)
- ◆ Automatically generated metrics: Halstead (Software Science Volume) - McCabe (Essential Complexity) - McCabe (Cyclomatic Complexity) - McClure (Control Variable Compl.) - Control Flow Knots - FP

**Accessory Features:**

- ◆ All metrics, including FP, are stored in VIASOFT's Application Knowledge Repository
- ◆ Assessment: comparison of one application against other selected applications
- ◆ Quality Assessment: establishes a baseline and identifies application's quality evolution
- ◆ Trend Analysis: compare and plot against the last 20 versions of the metric
- ◆ Multi level information aggregation: program - application - enterprise
- ◆ Inputs data from any COBOL code generator
- ◆ Exports data to spreadsheets, databases, graphics packages
