Development of An International Consensus on the Software Engineering Body of Knowledge

Alain Abran

P. Bourque,R. Dupuis, J. W. Moore, L. Tripp

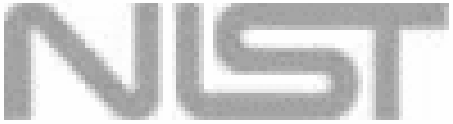
Universidad de Alcala,

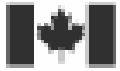
Alcala de Heneres (Spain)

June 2005

Corporate Support by:

CANADIAN COUNCIL OF PROFESSIONAL ENGINEERS
CONSEIL CANADIEN DES INGÉNIEURS





National Research Council Canada

Conseil national de recherches Canada

Project managed by:

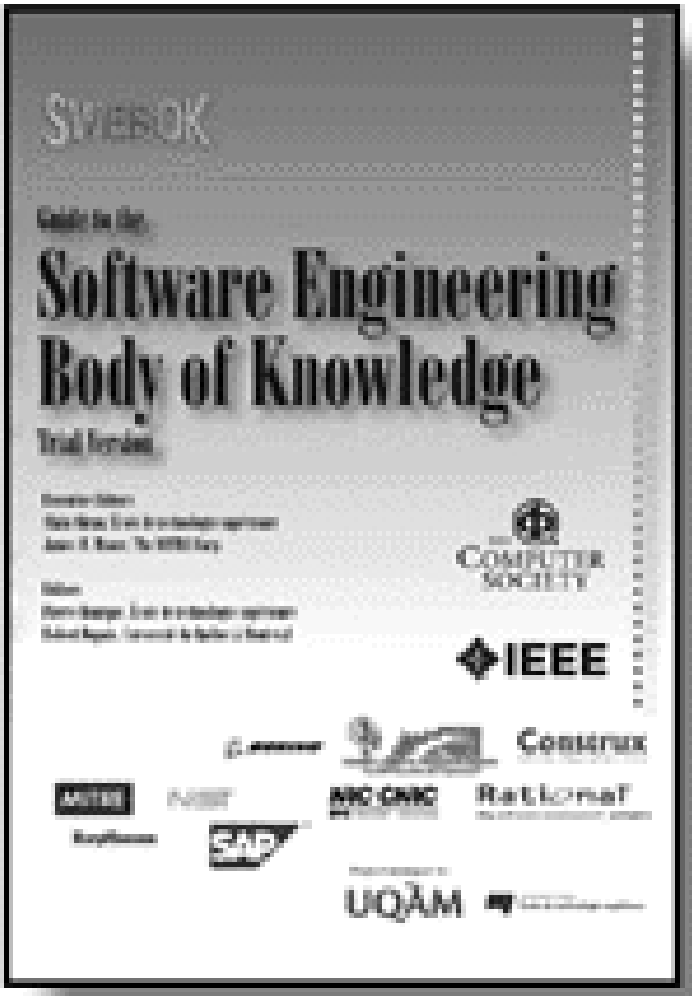
Université du Québec
École de technologie supérieure

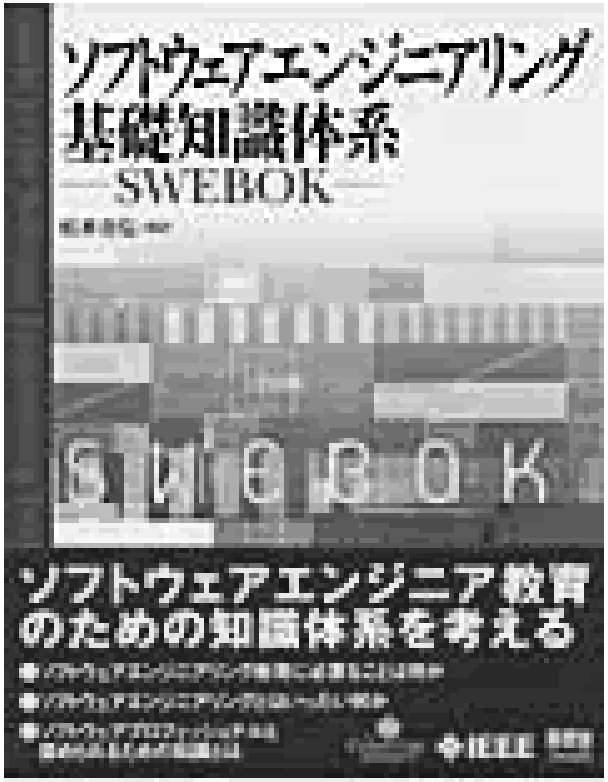
Guide to the Software Engineering Body of Knowledge (SWEBOK®)

- Began as a collaboration among IEEE CS, ACM and the Université du Québec à Montréal
- International participation from industry, professional societies, standards bodies, academia, authors
- Over 500 hundred software engineering professionals have touched the document
- Release of Trial Version in 2001

® Registered in U.S. Patent Office

Trial Version (2001)





2004 SWEBOK Guide

- Available on www.swebok.org
- The 2004 Version was endorsed by the project's Industrial Advisory Board in January 2004 and approved by the IEEE Computer Society Board of Governors in February 2004
- In May 2005, published in book format by the IEEE Computer Society Press
- To be published as ISO Technical Report 19759

List of Knowledge Areas

- Software Requirements
- Software Design
- Software Construction
- Software Testing
- Software Maintenance
- Software Configuration Management
- Software Quality
- Software Engineering Tools & Methods
- Software Engineering Process
- Software Engineering Management

Presentation Objectives

- Give an overview of the emergience process for this international consensus on the “core body of knowledge” of software engineering
- Present the development process used to reach this consensus
- Illustrate some uses of the SWEBOK Guide

Presentation Plan

- **Project background**
- Project scope, objectives, audience and development process
- Contents of the Guide
- Some uses of the Guide in organizations
- Evolution of the Guide
- Conclusion
- Appendix: Breakdown of topics

What is Software Engineering?

- IEEE 610.12*:
  - "(1) The application of a systematic, disciplined, quantifiable approach to the development, operation, and maintenance of software; that is, the application of engineering to software.
  - (2) The study of approaches as in (1)."

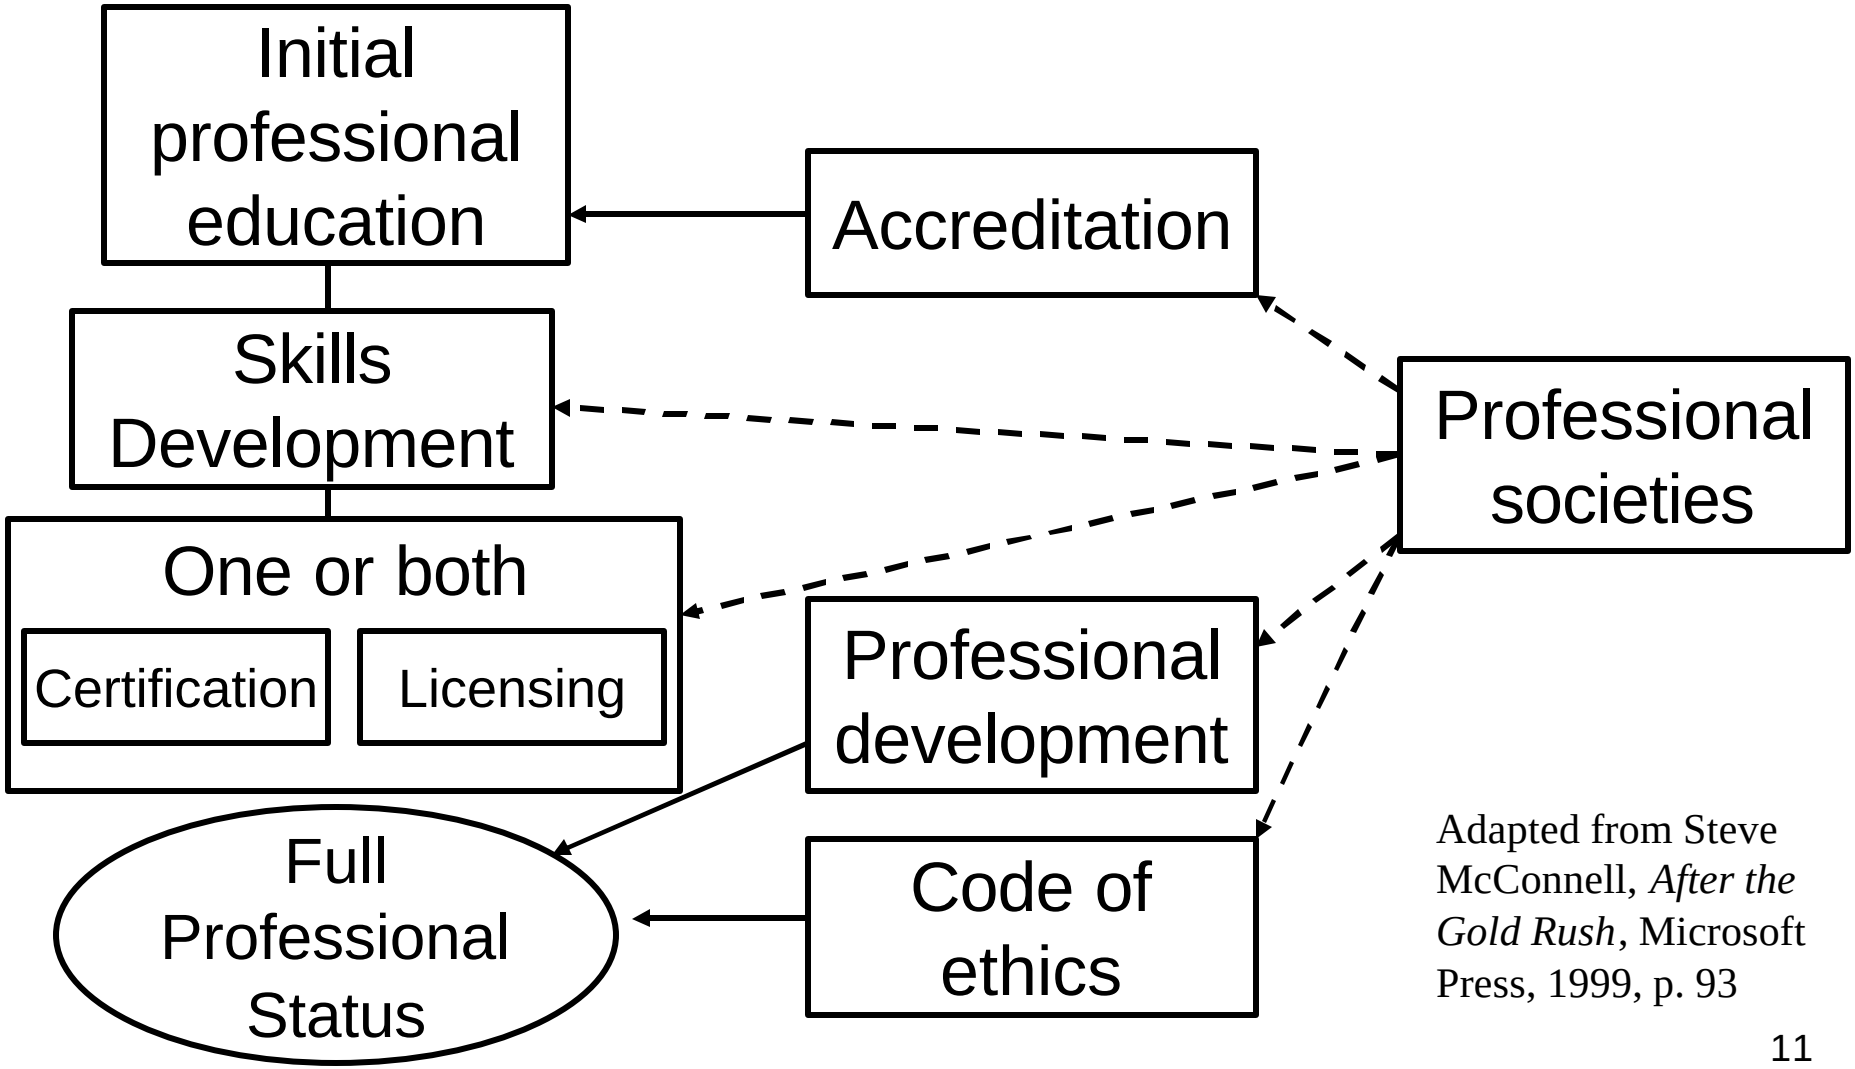
* IEEE Standard Glossary of Software Engineering Terminology, 1990.

Recognized Profession?

- Starr*:
  - Knowledge and competence: validated by the community of peers
  - Consensually validated knowledge: rests on rational, scientific grounds
  - Judgment and advice: oriented toward a set of substantive values

* P. Starr, *The Social Transformation of American Medicine*: BasicBooks, 1982.

Development of a Profession



Adapted from Steve McConnell, *After the Gold Rush*, Microsoft Press, 1999, p. 93

Presentation Plan

- Project background
- **Project scope, objectives, audience and development process**
- Contents of the Guide
- How can you leverage the Guide within your organization?
- Evolution of the Guide
- Conclusion
- Breakdown of topics

Project Objectives

- Characterize the contents of the Software Engineering Body of Knowledge
- Provide a topical access to the Software Engineering Body of Knowledge
- Promote a consistent view of software engineering worldwide

Project Objectives

- Clarify the place of, and set the boundary of, software engineering with respect to other disciplines (computer science, project management, computer engineering, mathematics, etc.)
- Provide a foundation for curriculum development and individual certification and licensing material

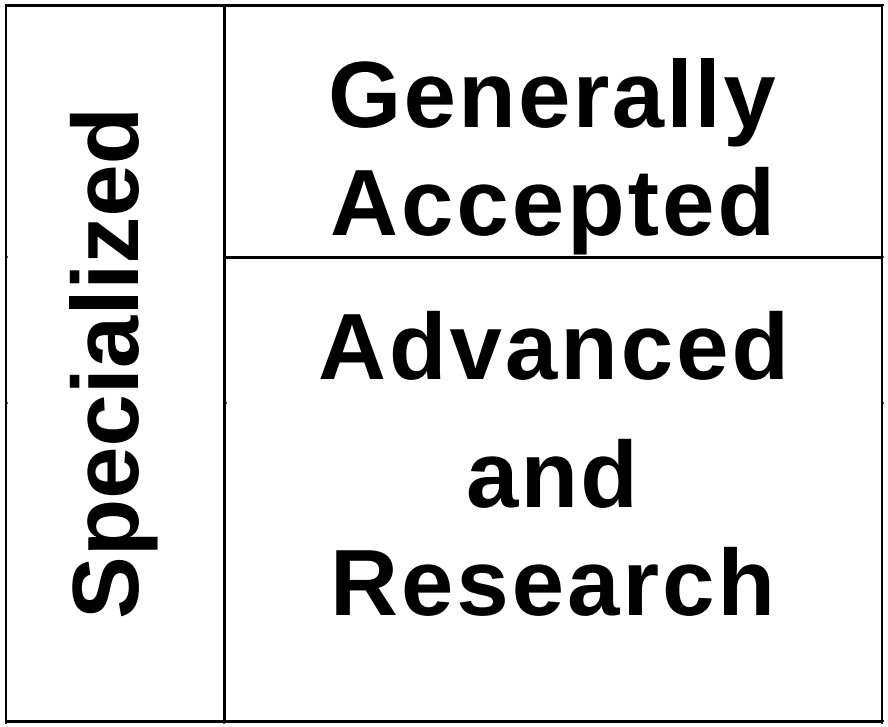
Intended Audience

- Public and private organizations
- Practicing software engineers
- Makers of public policy
- Professional societies
- Software engineering students
- Educators and trainers

What Was Out of Scope?

- Not a curriculum development effort!
- Not an all-inclusive description of the sum of knowledge in the field
- Not all categories of knowledge

Categories of Knowledge in the SWEBOK

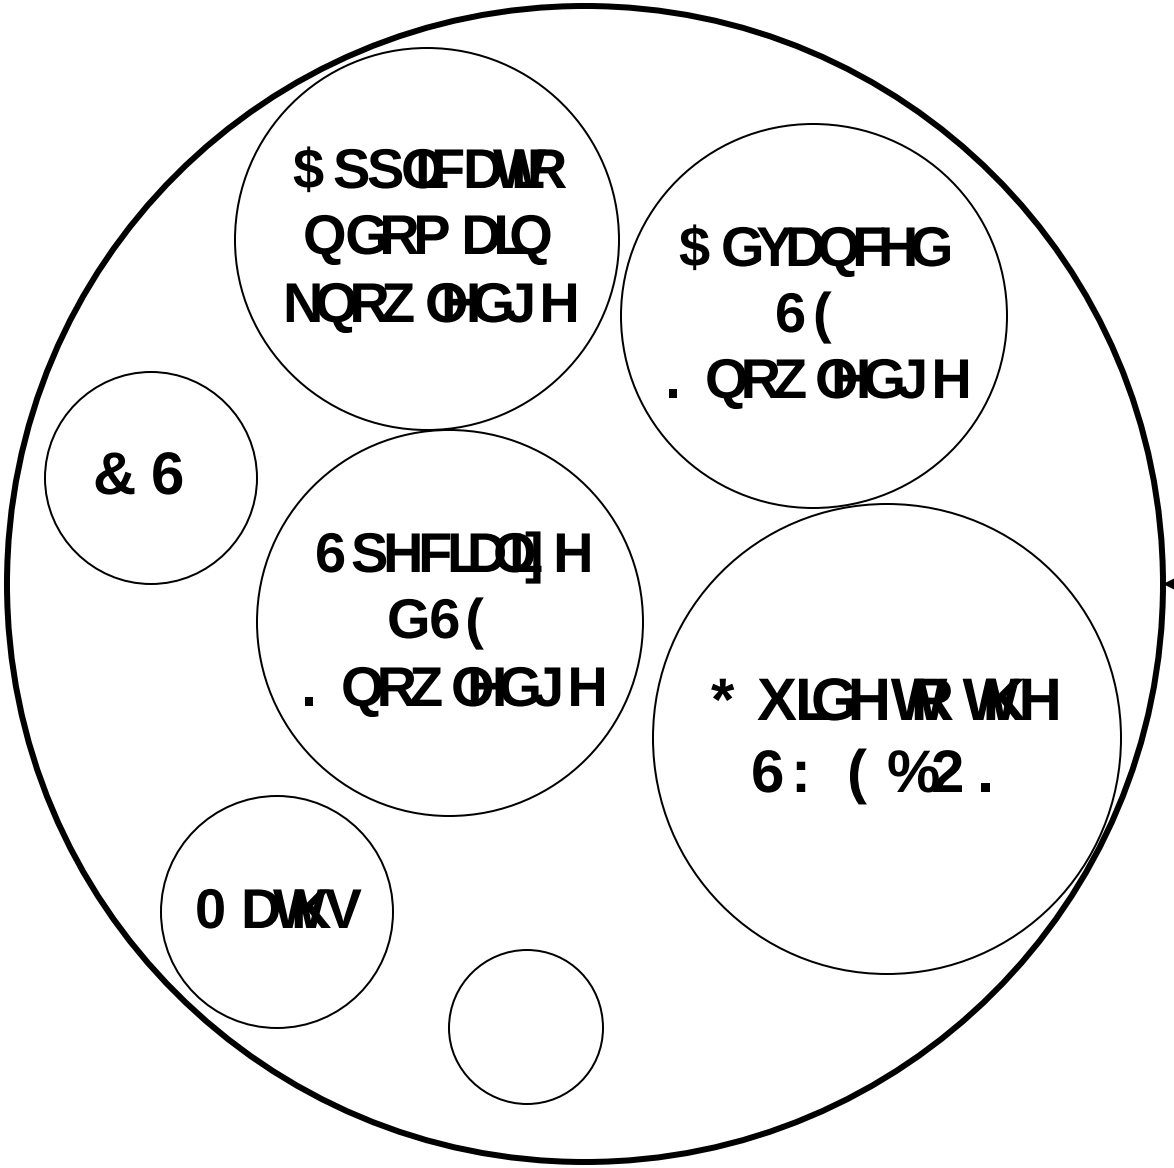


Target of the SWEBOK Guide

«Applicable to most projects, most of the time, and widespread consensus about their value and usefulness»

Project Management Institute - PMI

⊙ North American Bachelor's degree + 4 years of experience



. QRZOHGJH RI D 6RIWZDUH (QJLQHHU

Three Underlying Principles of the Project

- ***Transparency***: the development process is itself published and fully documented
- ***Consensus-building***: the development process is designed to build, over time, consensus in industry, among professional societies and standards-setting bodies and in academia
- Available ***free*** on the web

Project Team

- Editorial Team of the Guide
- Industrial Advisory Board
- Associate Editors of the Knowledge Areas
- Reviewers

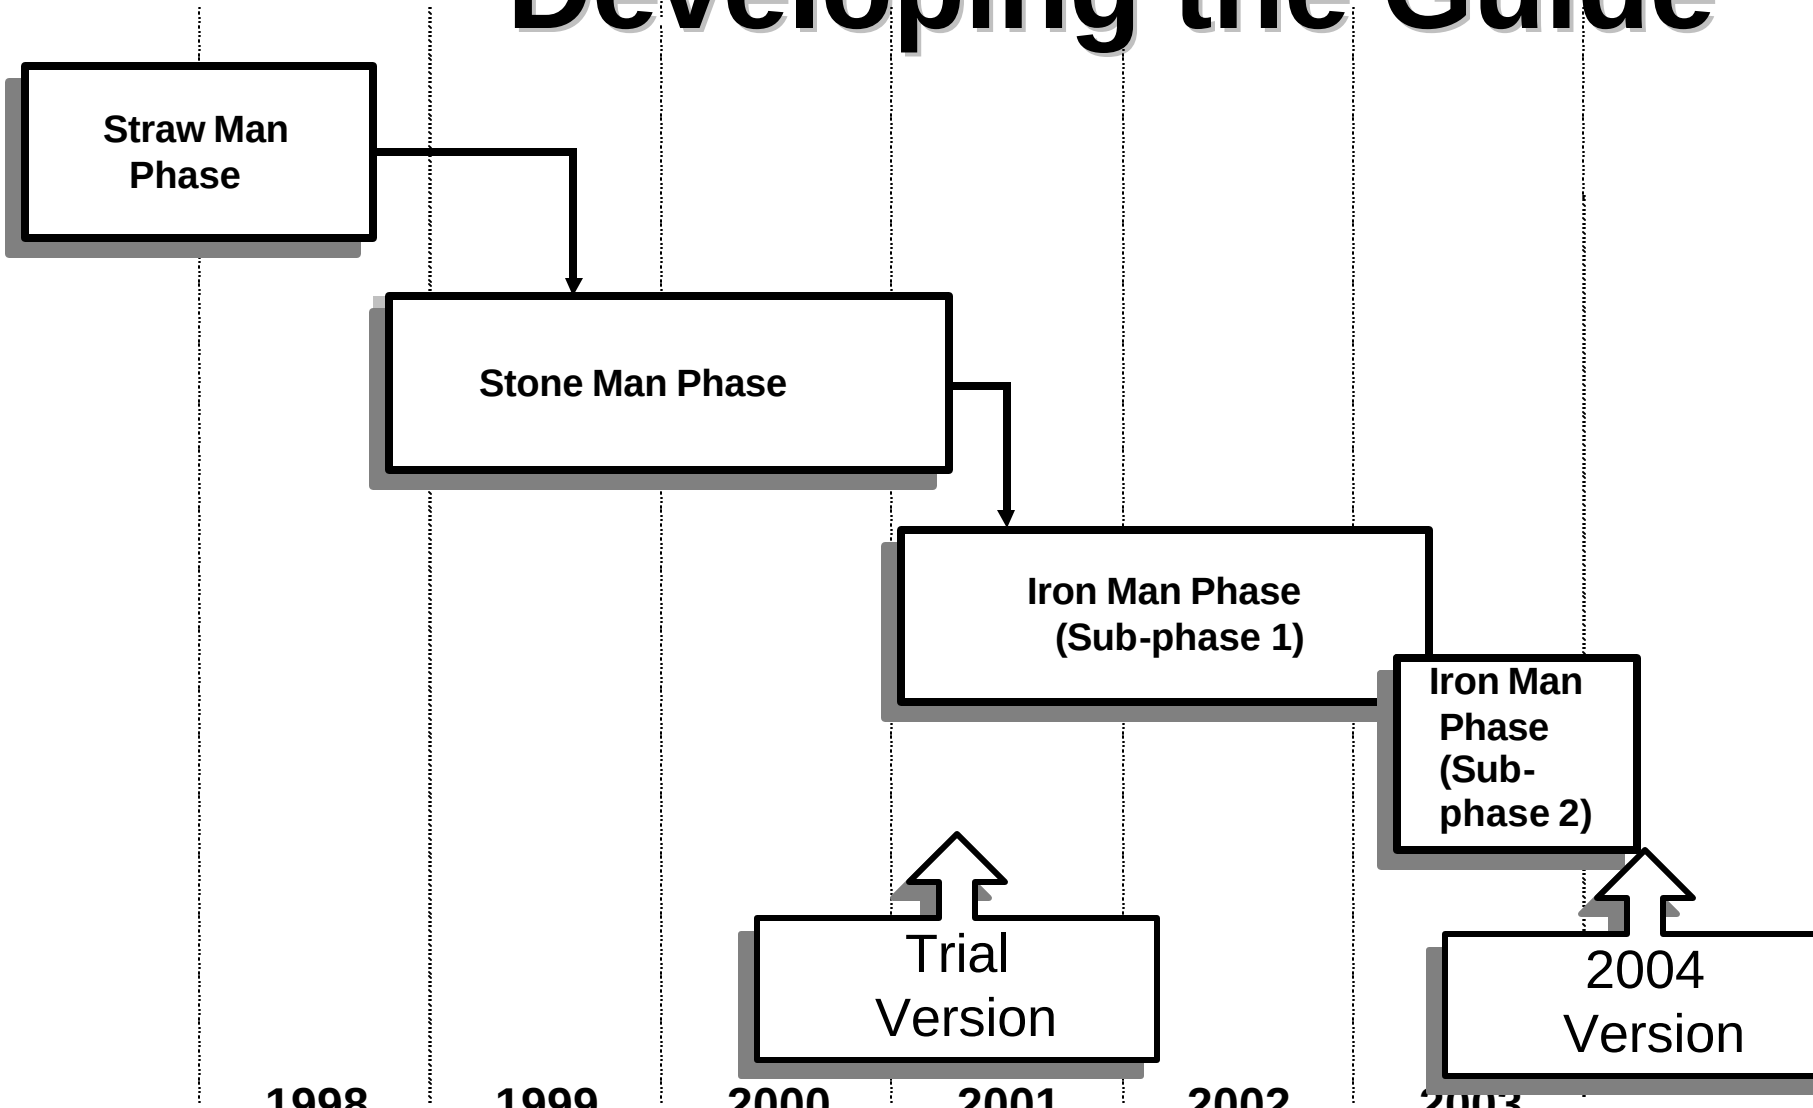
Roles of the Industrial Advisory Board

- Provide input to ensure relevance to various audiences
- Review and approve strategy and deliverables
- Oversee development process
- Assist in promoting the Guide to the Software Engineering Body of Knowledge
- Lend credibility to the project

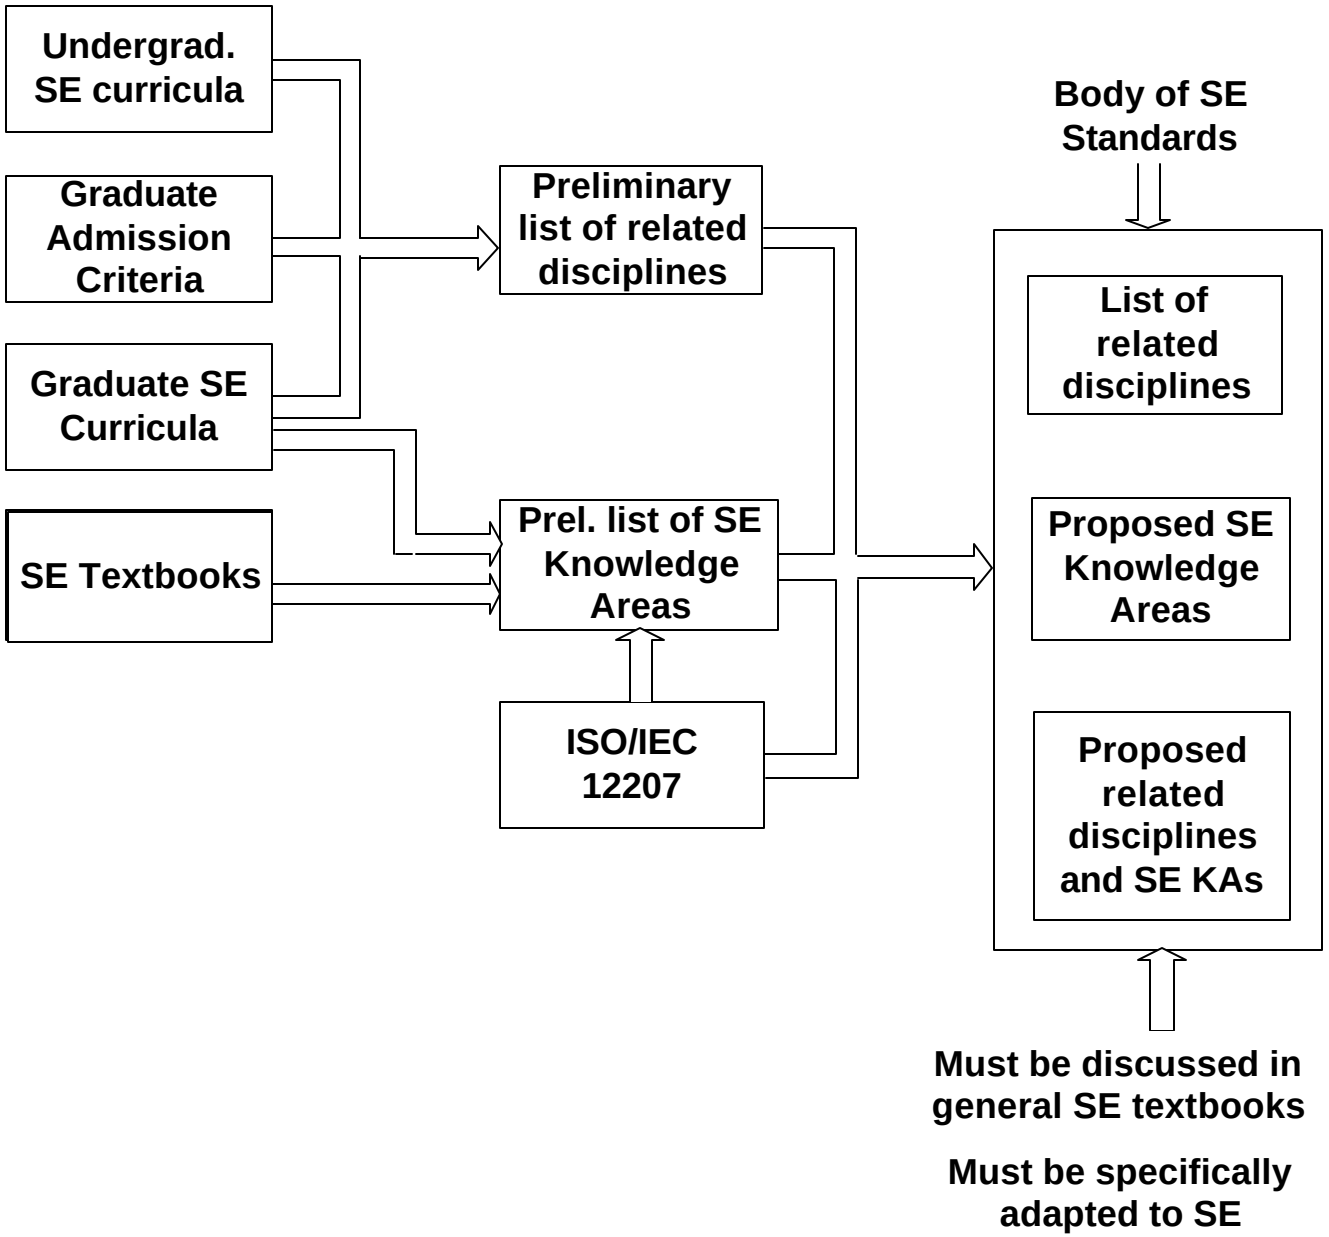
Formal resolutions

- Industrial Advisory Board (2001)
- IEEE CS Board of Governors (2001)
  - *"The Board of Governors of the IEEE Computer Society accepts the Guide to the Software Engineering Body of Knowledge (Trial Version) as fulfilling its development requirements and is ready for field trials for a period of two years"*
- *IEEE CS Board of Governors (Feb. 2004)*
  - *Officially approved the 2004 Version*
- *ISO Technical Report 19759 (upcoming)*

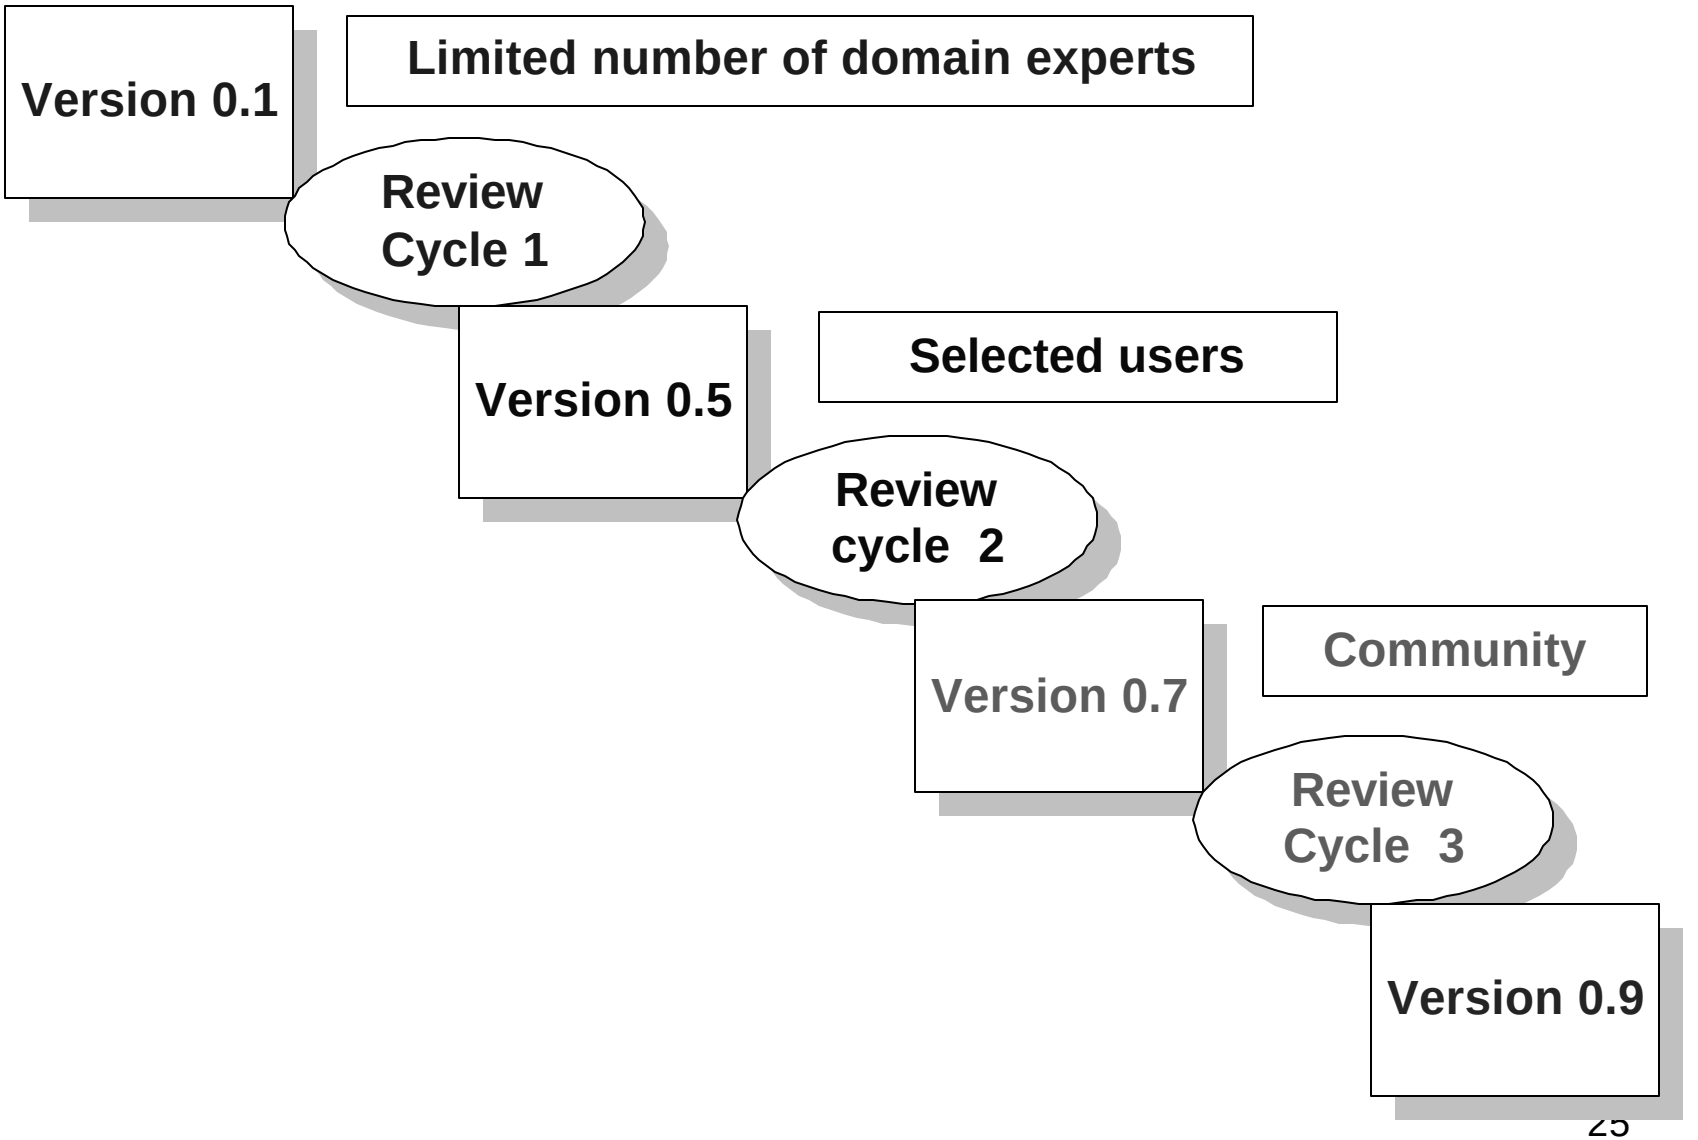
A Three-Phase Approach for Developing the Guide



Process - Strawman



Stoneman- Trial Version Review Process



Trial Version Review Process

- Transparency and consensus-building
  - All intermediate versions of documents are published and archived on **www.swebok.org**
  - All comments are made public as well as the identity of the reviewers
  - Detailed comment disposition reports are produced for Review Cycle 2 and 3

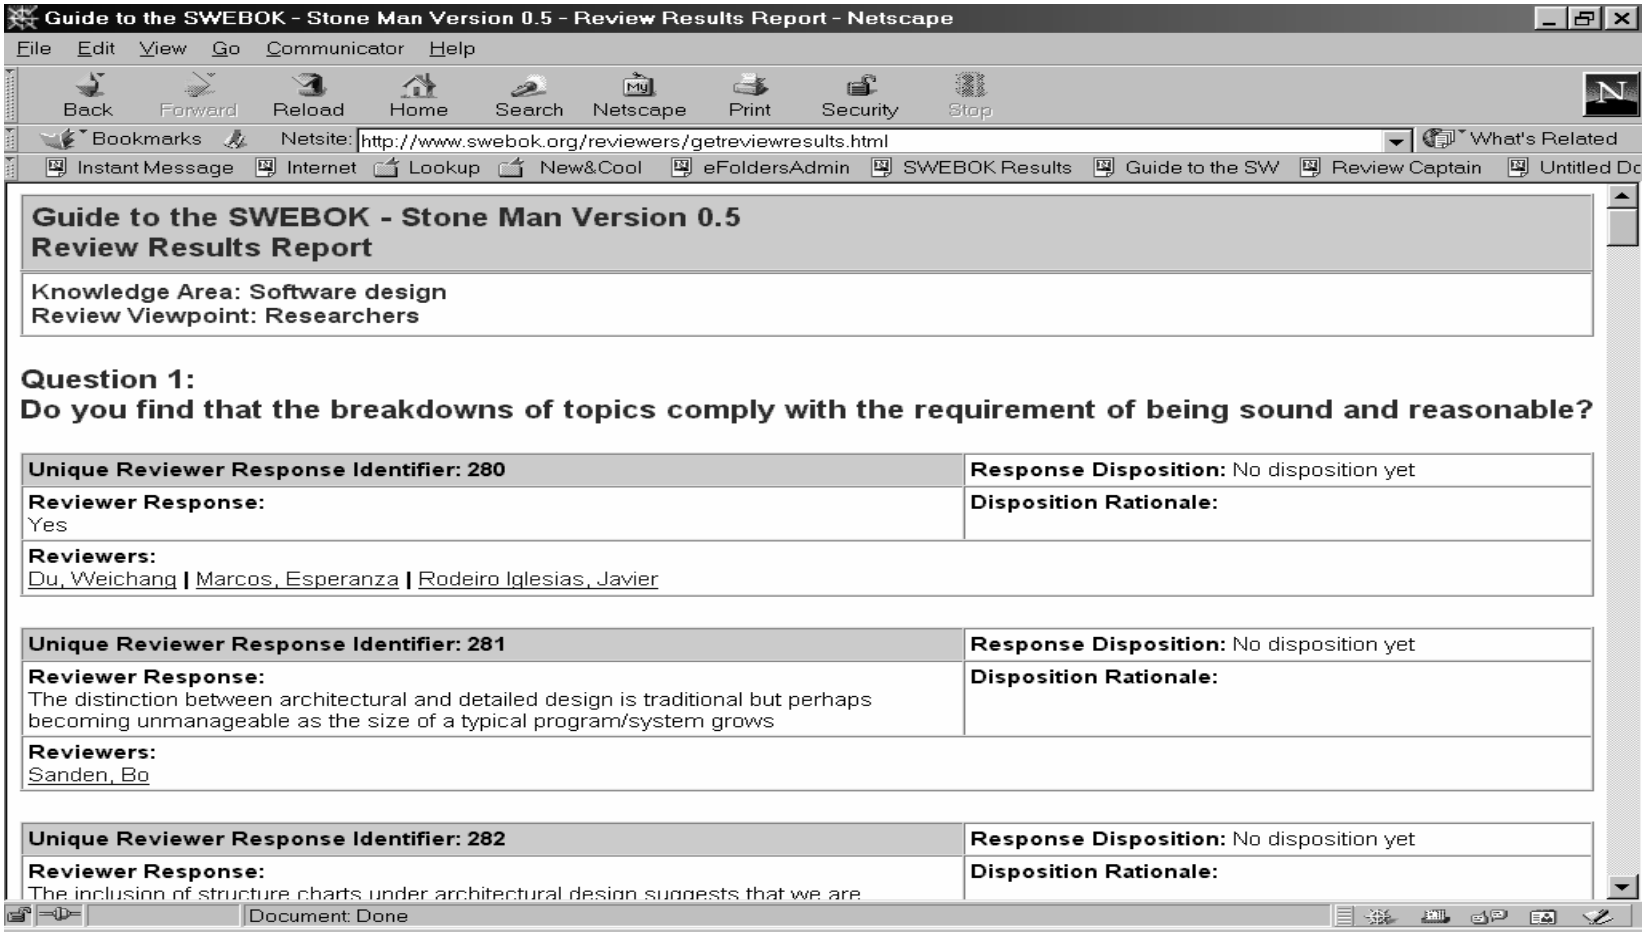
Comment Resolution



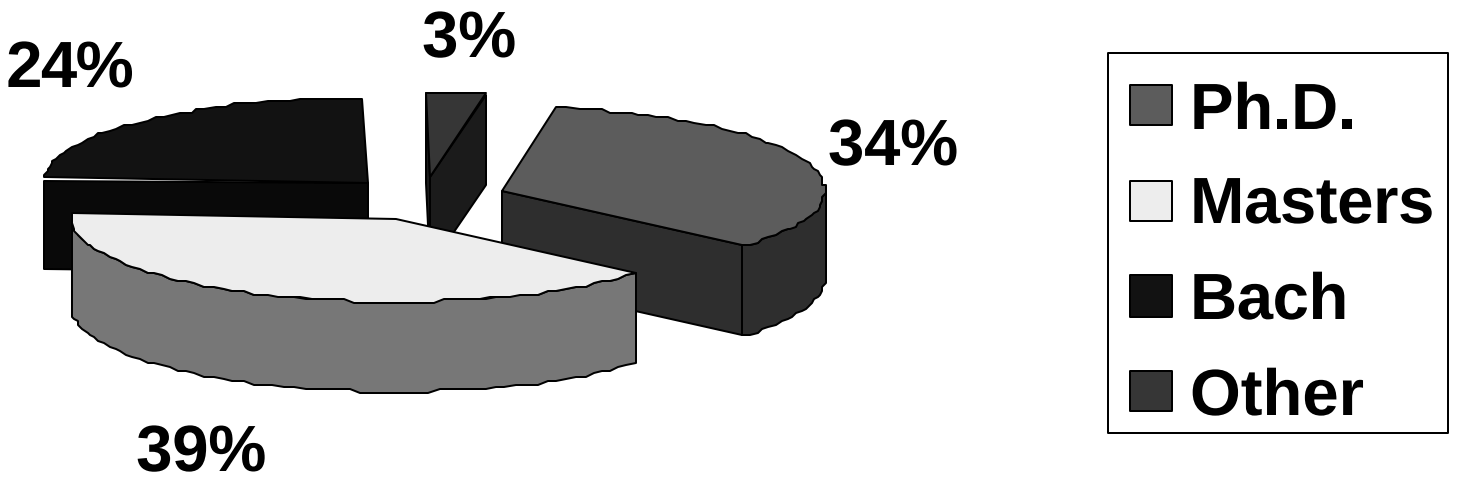
Data on reviewers Trial Version

- Version 0,1: 33
- Version 0,5: 195
- Version 0,7: 378
  - + ISO reviews from 5 countries

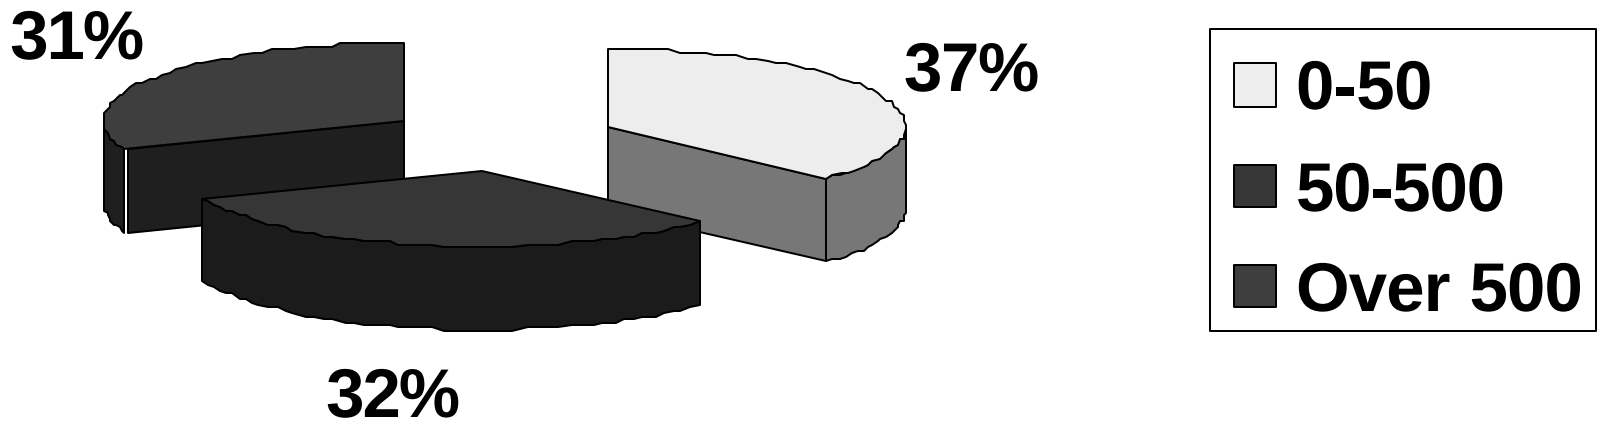
Geographic Distribution of Reviewers Trial Version

- USA: 55%
- Europe: 18%
  - 90 reviewers from 25 countries
- Canada: 10%
- Australia: 5%
- Asia: 5%
- Latin America: 4%

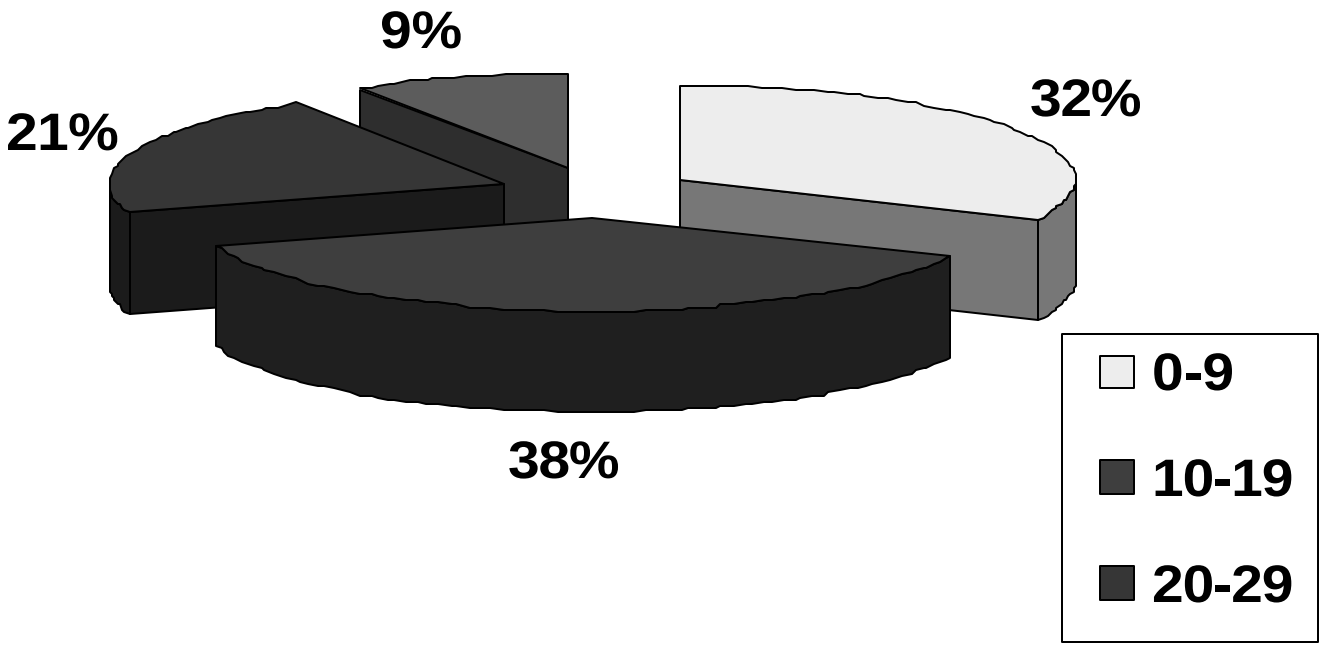
Education level of reviewers (Version 0,7)



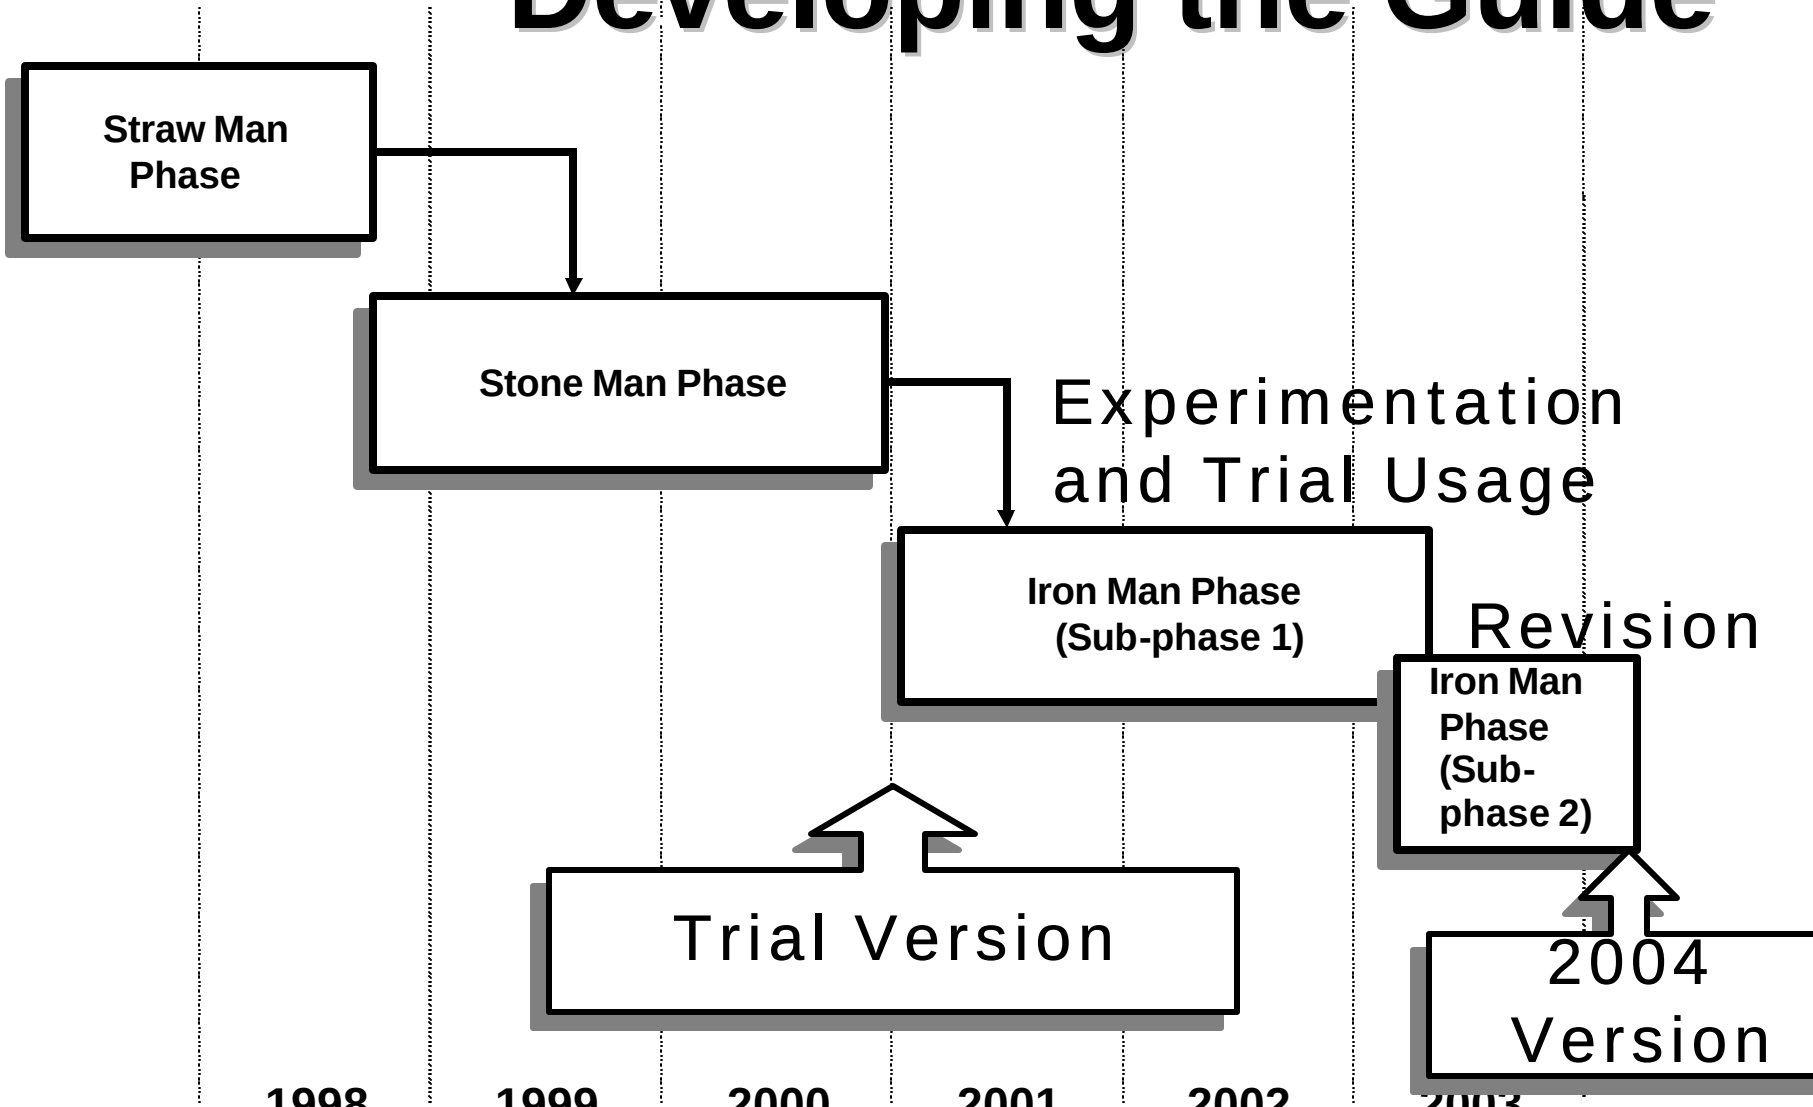
Number of employees at reviewer location (Version 0,7)



Number of years of practical experience (Version 0,7)



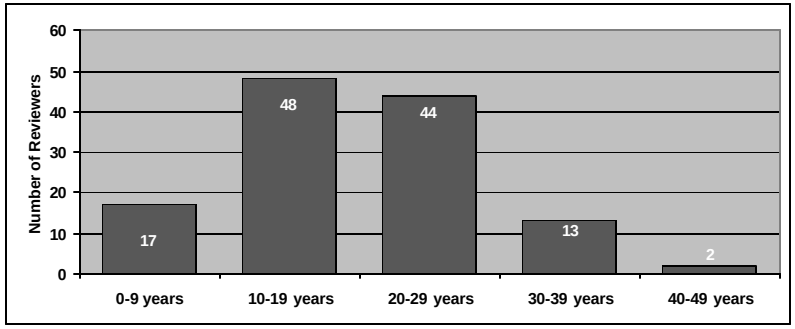
A Three-Phase Approach for Developing the Guide



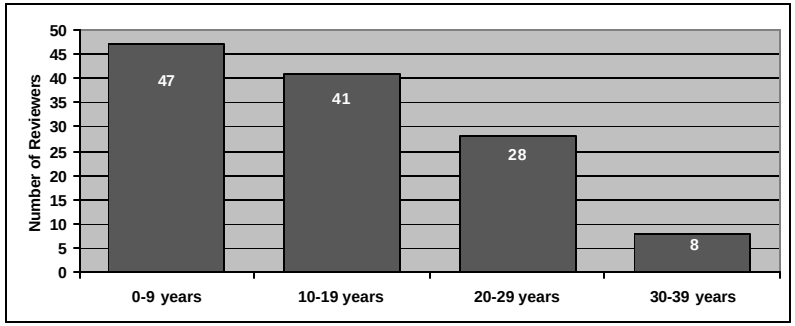
Reviewers (2004 Version)

- Registered reviewers: 573
- Number of countries: 55
- Number of comments: 1020
- Number of reviewers submitting comments: 124
- Number of represented countries: 21

Years in the field



Years in industry



Project Overview Presentation Plan

- Project background
- Project scope, objectives, audience and development process
- **Contents of the Guide**
- Uses of the Guide in organizations
- Evolution of the Guide
- Conclusion
- Appendix: Breakdown of topics

Deliverables:

- **Consensus** on a list of Knowledge Areas
- **Consensus** on a list of **topics and relevant reference materials** for each Knowledge Area
- **Consensus** on a list of Related Disciplines

Knowledge Areas and Related Disciplines

- Software Requirements

Summary of changes in 2004 Version

- Standardization of the contents of the chapters in terms of table of contents, topic breakdown, terminology, reference citations and writing style
- Structural improvements in the breakdown of topics:
  - Software Construction,
  - Software Engineering Management,
  - Software Quality,
  - Software Engineering Process
- Better representation of text in topic breakdown :
  - Software Requirements,
  - Software Testing,
  - Software Maintenance

Summary of changes in 2004 Version

- New chapter on Related Disciplines (instead of an appendix)
- Better representation of standards in chapters and a new Appendix devoted to standards
- Updating of reference material
- Handling of trial usage feedback
- Handling of reviewer comments

Presentation Plan

- Project background
- Project scope, objectives, audience and development process
- Contents of the Guide
- Uses of the Guide in organizations
- Evolution of the Guide
- Conclusion
- Appendix: Breakdown of topics

Applications of the Guide

- Industry & Government
  - Career planning
    - Construx
  - Inter-company benchmarking
  - Hiring
  - Job and role descriptions
    - Bombardier Transportation
  - Policy making
    - Turkish Industry Survey, Alberta Software Testing Survey

Applications of the Guide

- Professional development
  - Security Industry Automation Corporation
  - SAP, Boeing Australia
  - http://www.software-kompetenz.de

Applications of the Guide

- Education
  - Course Design/Assessment:
    - École de technologie supérieure
  - Program Design/Assessment:
    - CRISTEL project
    - National Technological University
    - Monash University – see http://www.csse.monash.edu.au/~doit/cgi-bin/live/index.php.cgi

Applications of the Guide

- Licensing & Certification
  - IEEE CS CSDP
  - Ordre des ingénieurs du Québec

Presentation Plan

- Project background
- Project scope, objectives, audience and development process
- Contents of the Guide
- Uses of the Guide in organizations
- Evolution of the Guide
- Conclusion
- Appendix: Breakdown of topics

Evolution of the Guide

- Copyright belongs to the IEEE
  - They must decidethe evolution of the Guide
- Transition to self-supporting, volunteer-led process—i.e. self-funded.
- Coordination with related projects (internal and external)
- Time-boxed block updates
- Involvement with stakeholder groups
- Openness and transparency
- Technical excellence

Presentation Plan

- Project background
- Project scope, objectives, audience and development process
- Contents of the Guide
- How you can leverage the Guide within your organization
- Evolution of the Guide
- Conclusion
- Appendix: Breakdown of topics

Concluding Remarks

- Consensus on the core body of knowledge is key in all disciplines and pivotal for the evolution toward a professional status
