ABSTRACT

Green businesses are enterprises which consider environmental protection as an essential component for their long-term business objectives, both by promoting eco-efficient production activities and by marketing sustainable products and services (Barnes, n.d.). Green products may be defined as products or services that have a lesser or reduced bad effect on human health and the environment when compared with competing products or services that serve the same purpose (Website). The purpose of green business are (i) to promote more socially inclusive development (ii) to reduce environmental degradation (iii) to mitigate the effects of climate change (iv) to deal with pressures of population growth (v) to manage issues of increased scarcity and volatile prices of raw materials effectively. Examples of green product are compact fluorescent lamps (CFLs), which use 75% less energy than ordinary incandescent ones, organic foods, which are grown and processed without antibiotics, pesticides, or synthetic fertilizers, hybrid electric vehicles such as the Toyota Prius, which achieves a fuel economy of 48 city-mpg and 45 highway-mpg (Website), and green hotels, which are trying to conserve water, energy, and materials usage (Sharkey, 2008). Green business in practically existent everywhere around us. Company such as Wal-mart and General Electric transforming their business practices into green ones (Yeganeh & Glavas, 2008). In a study conducted by Mc Kinsey of 4,238 business executives in 116 countries, 84% believed that business should contribute to the public good; however, only 3% believe that their companies are currently doing a good job (McKinsey, 2006). Thus, green business is an enterprise that has no negative impact on the (i) environment (ii) economy (iii) society (iv) community. Further, it meets the requirement of the triple bottom line such as financial benefits of the company, natural world betterment and social advantages for employees and members of the local community. The triple bottom line gives importance on initial value instead of the after effects.

Key words: Green Consumerism, Green products, Green business, volatile prices, triple bottom line.

JEL Classification Code: M31; Q13; P46
CRITERIA OF GREEN BUSINESS

The green business meets the following four criteria viz. (a) the business decisions of the company incorporate sustainability principles (b) the company manufactures environmentally friendly products/services (c) it replaces demand for non-green products (d) it ensures enduring commitment to implement environmental principles in all business operations management (e) the company is totally different in concept as well as in practice. Thus, it is a business that “meets the needs of the present world without compromising the ability of the future generations to meet their own needs. The green business with the supply chain try to trade-off among the three components of the triple bottom line concepts such as better impact on the environment, high growth of business and social development. As such, it argued that green business is a three legged stool of (i) people (ii) planet. However, the time line of key events in green product consumerism from 1998 to 2010 has been show in Fig.1.

<table>
<thead>
<tr>
<th>Year</th>
<th>Key Events</th>
</tr>
</thead>
<tbody>
<tr>
<td>1980</td>
<td>Few products carry environmental marketing messages. But “organic” and “natural” foods gain popularity. Consumer awareness is heightened and more “green” choices arise: homemade cleaning products and resource lists for shopping are examples. “Green” becomes a talk of the town only in the market but also in academic.</td>
</tr>
<tr>
<td>1990</td>
<td>Consumer willingness to pay for green features leads to a dramatic increase in green consumerism. 92% European multinational companies rework product development to reflect “green” concern; 85% alter production systems. “Green” brands are niche markets. High levels of consumer concern are not reflected in purchasing power. Market shifts towards global business and affordable energy leading to less spending on “green” products.</td>
</tr>
<tr>
<td>2000</td>
<td>Green building rating systems, eco labels and certification programs increase in number. These programs largely focus on reduction of greenhouse gas emissions, conservation and wise use of natural resources and building occupant productivity related to IEQ. Research determines that protecting individual and family health is the #1 motivator for consumers to actively work towards protecting the environment. Chemical emissions and exposure to very small traces of VOCs from common indoor materials and finishes are found to impact human health. Total number of green products in stores increase by an average of 79%. Studies show that 60% of those surveyed look for minimally packaged goods, 58% purchase green cleaning products and 31% buy green personal care products.</td>
</tr>
<tr>
<td>2010</td>
<td>Green chemistry emerges and the federal government activity considers integrating into legislation.</td>
</tr>
</tbody>
</table>

GREEN PRODUCTS

Green business produces green products. The green business should consider the strategies like water conservation, energy conversation, solid waste reduction and recycling, pollution, prevention, etc. Data, thus, collected regarding green products in study areas have been shown in the pie chart-1. The pie chart-1 shows that 27% respondents were sapling plantation; 17% poultry farming; 15% fruits production; 11% manufacturing garments; 8% goat rearing; 7% rice production; 5% dairy farming; 6% flower production and 4% furniture manufacturing.

Figure- 1: Pie Chart-Green Products

It has been reported that the respondents are motivated to work hard for their livelihoods. The research identified that there are two types of capital required to change the pattern of growth of the study areas viz. human capital and social capital. Human capital may be defined as the capabilities of an individual or group i.e. the knowledge, training and skills that contribute to increase their productivity in their production system. Social capital may be defined as the connections among different stake-holders within social networks that have a value for their mutual benefits. It has been reported that the sample respondents of the study areas are in the following vicious cycle in figure-2:

Figure-2: Vicious Cycle
GREEN CONSUMER

Green consumers are the consumers who choose to purchase environmentally friendly products. The development of green products whether in the context of human resources, operations or marketing required new ideas while dealing with added constraints of environmental and consumer pressures (Cronin, et. al., 2010). However, the activities of green products are as follows (Amatruda, 2010):

- Incorporate recycle content
- Renewable resources
- Local resources and manufactures
- Employ sustainable harvesting practices wood or bio-based
- Bio degradable
- Easily reused either whole or through dissembling
- Be able to readily recycle without significant deterioration of quality

GREEN JOBS

Green jobs may be defined as activities that contribute substantially to preserving environmental quality. These jobs are plumbers, electricians, general workers, environmental specialist, etc. The literature review reveals that the sectors of economy can create new green jobs. These sectors are sustainable agriculture, transportation, energy efficiency, renewable energy, etc. It has been reported that the livelihoods of the sample respondents may be changed through green business training. These are (i) to familiarize stakeholders with green business and related concepts (ii) to illustrate the importance/interrelations among of green businesses (iii) to identify possible policies and measures for implementation (iv) to make proactive corporate marketing and active government intervention, etc. The mechanism of government interventions are (a) regulations (b) to make reformation (c) re-consumption (d) reorientation (e) reorganization (Dutta, 2009).

Further, it has been revealed that the steps to green business are as (i) learning what it means to be a green business (ii) reduce consumption, waste and pollution (iii) re-use what ones have (iv) recycle everything ones can (v) learn how going green can save money (vi) green ones business from the ground up (vii) develop and implement a green checklist (viii) review ones processes (ix) environmental education & networking, etc.

CONCLUDING REMARKS

Green consumerism includes mainly 3 ‘R’ like Reduce, Re-use and Recycle, Reduce consumption means turn-off lights, recyclable packaging, reduce car use, etc. Re-use means repurchase rechargeable batteries, washable towels, re-useable shopping bags, etc. Recycle means re-blending, reprocessing, and recyclable products, recycle papers, etc. It has been observed that cans bottles, plastics, paper, cardboard can all be recycled easily. By analyzing existing literature and based on our field survey, it may be concluded that green businesses as well as green jobs may be explored for better livelihoods of the sample respondents of study areas. As such, for creating fortune for the rural women especially for women the virtuous cycle may be considered which has been shown in figure-03.

REFERENCES

Global Disclosure of Economics and Business
(Peer reviewed international journal)

Open Access Philosophy
Under Open Access Philosophy, GDEB will not charge for the access of its journals. This will ensure that a large percentage of students, scholars, researchers and practitioners will be able to benefit from the research published through ABC journals. Moreover, this process will also enable authors’ papers to receive a higher ranking. A greater number of people being able to access and consequently refer to papers will mean a higher citations and Impact Factor for ABC journals. Following are advantages of Open Access Philosophy:

1. Your research work will be indexed and abstracted in the internationally reputed databases and search engines immediately after publication.
2. Open Access increases the number of downloads, page views, citations etc. increasing the rate of dissemination of your research work manifold.
3. It is inferred from past researches that the papers published under "Open Access Philosophy" are four times more likely to be cited than the papers published under "Non-Open Access Philosophy"

Peer Review Policy
Paperless, web-based peer review system, professional and helpful suggestions from reviewers. Articles in this journal have undergone a rigorous blind peer review system, based on initial editor screening and involving in-country and international refereeing, ensures that articles meet the highest standards of quality. Most ABC journals have ISSN with Global Indexation. It facilitates our scholars, researchers, scientists, professors, corporates, governmental research agencies, librarians etc., in a more positive way in their research proceedings.

Faster Turnaround Time
Many journals take many months, even years to publish research. By the time papers are published, often they become outdated. GDEB publishes papers in the shortest possible time, without compromising on quality. This will ensure that the latest research is published, allowing readers to gain maximum benefit. We provide feedback instantaneously and furnish details of the outcome within about 5 - 6 working days of submission of your research paper. This enables research scholars to use their time effectively on the actual research rather than on the follow ups.

Strong International network & Collaboration
We have exposure to wide range of industries across geographies and worldwide connect through international colleagues and thereby the recognition. We work in collaboration with extremely creditable companies, academic institutions, reputed publication units, government bodies and research firms. By publishing with us, you join ABC Global Research Community of 50,000 scientists / researchers.

It gives us immense pleasure to forward the link of the current issue of our Journal Asian Accounting and Auditing Advancement (4A Journal) circulated all over the world 141 countries/territories (Japan; United Kingdom; United States; Russia; Australia; China; Canada; France; Germany; Hong Kong; Italy; Mexico; New Zealand; Singapore; Spain; Swaziland; Switzerland; Taiwan; Afghanistan; Albania; Algeria; Argentina; Armenia; Austria; Bahrain; Bangladesh; Barbados; Belgium; Benin; Bhutan; Bolivia; Bosnia and Herzegovina; Botswana; Brazil; Brunei; Bulgaria; Cameroon; Chile; Colombia; Congo [DRC]; Costa Rica; Côte d'Ivoire; Croatia; Cyprus; Czech Republic; Denmark; Djibouti; Egypt; Eritrea; Ethiopia; Fiji; Finland; Gambia; Georgia; Ghana; Greece; Guatemala; Guyana; Hungary; Iceland; India; Indonesia; Iran; Iraq; Ireland; Israel; Jamaica; Jersey; Jordan; Kazakhstan; Kenya; Kuwait; Kyrgyzstan; Laos; Latvia; Lebanon; Lesotho; Liberia; Libya; Lithuania; Luxembourg; Macau; Macedonia [FYROM]; Malawi; Malaysia; Maldives; Malta; Mauritius; Moldova; Morocco; Mozambique; Myanmar [Burma]; Namibia; Nepal; Netherlands; Nicaragua; Nigeria; Norway; Oman; Pakistan; Palestinian Territories; Panama; Papua New Guinea; Paraguay; Peru; Philippines; Poland; Portugal; Qatar; Romania; Rwanda; Saudi Arabia; Senegal; Serbia; Sierra Leone; Slovakia; Slovenia; South Africa; South Korea; Sri Lanka; Sudan; Suriname; Sweden; Syria; Tanzania; Thailand; Togo; Trinidad and Tobago; Tunisia; Turkey; Uganda; Ukraine; United Arab Emirates; Uruguay; Uzbekistan; Venezuela; Vietnam; Yemen; Zambia; Zimbabwe), for your kind reference and record.
Asian Business Consortium (ABC) is a multi-disciplinary research, training, publishing, digital library supporting and service house. Though founded in 2010 as the Business and Computing organization of Asia, it was reconstituted as the ABC in 2011. It has been working for creating and nurturing talents in USA, Malaysia and Bangladesh since its inception. As ABC is going global, it intends to open offices in Australia, Germany, Japan, Pakistan, and other Asian countries in near future. The objectives of consortium are solely centered round the welfare and humane attitude of the founders who enthusiastically took up this noble cause and materialized it with a view to promote research and educational activities for the encouragement of scholars to develop their knowledge, to publish their analysis oriented scientific researches in international Journals, books, the task of organizing workshops, seminars, conferences, training, personality development programs and allied services.

In addition to research activities, ABC provides a good number of scholarships to the poor and meritorious students at various levels of education throughout the world. It plays an important role in the field of research by funding research projects and publishing the research papers. This consortium will unquestionably become the mouth-piece of the dark horses and unacknowledged scholar whose endowed and commendable contributions shall be provided an outlet keeping in mind the greater good of the larger society of the world.

ABC runs the following international referred journals for creating a platform to share the thoughts of professionals, scholars and academicians throughout the world.

### Bangladesh Publications
- Asian Accounting and Auditing Advancement (4A Journal); **ICV 5.09**
- Asian Business Review (ABR); **UIF 0.1809**
- Asian Journal of Applied Sciences and Engineering (AJASE); **UIF 0.6351**
- Global Disclosure of Economics and Business (GDEB)

### USA Publications
- ABC Journal of Advanced Research (ABC JAR)
- International Journal of Reciprocal Symmetry and Theoretical Physics (IJRSTP)
- Engineering International (EI)
- American Journal of Trade and Policy (AJTP)

### Malaysia Publications
- ABC Research Alert (Online)
- Asian Journal of Humanity, Art and Literature (AJHAL)
- ABC Journal of Medical and Biological Research (ABC-JMBR)
- Asia Pacific Journal of Energy and Environment (APJEE)

Each journal home page provides specific information for potential authors and subscribers. Open access policy, the quick review process, rich editorial boards and quality publications have already made ABC Journals unique. **ABC Journals** are published under the direct supervisions of renowned academicians of the world.

**Collaboration in Conference:** ABC considers high-quality conference papers for publication. Please contact us for detailed information.

**Collaboration in Publishing:** If you like to start writing a book, propose a new journal or advertise in ABC journals, please feel free to contact us.
